CULBERSON-RADIO: About Jan 18 visual-aural rng will be shut down until approx Apr. 18 for conversion to omnirng. (1-11)
DALLAS-HIGHLAND PARK ARPT: Ditches 75' W of N/S Taxiway. Use rnwys, taxiways only. (12-26)

(1-16-51)

TEXAS: DALLAS-LOVE FLD: Taxiway leading from center intsxn to Terminal Bldg clsd (const). Equip on SE end Rnwy 31 days. Taxiway on SW of Rnwy 13-31 clsd 900' from SE end. Const area mrkd. (1-15)
DALLAS-MUSTANG ARPT: 94' poles being erected W of W bndry. (12-21)
DALLAS NAS (HENSLEY): Lmtd parking facs, trans billeting facs and refueling. (12-11)
ELLINGTON AFB (HOUSTON)-RADIO: AN/CPN-6 radar bcn (x-band) is inop. (9-9) USAF GCA operg for trng only. (12-17)
FT. WORTH-RADIO: Omnirng courses from 90° clockwise thru 120° - moderate to severe scalloping. (10-31)
GALVESTON-RADIO: VHF omnirng courses unreliable with moderate to severe scalloping and bends all quads. (1-6)
★GRAY AFB (CAMP HOOD)-RADIO: USAF X-band radar bcn has been comm. Ident: 1-1-1-1. Hrs oper: Cont. (1-12)
GRAY AFB (CAMP HOOD): Do not fly W of centerline of Rnwy 33. Apchs and dptrs in SE quadrant only. Avoid Camp Hood danger area. Soft shoulders. (6-30)
HOUSTON: Burning of ammunition daily, Mon thru Fri, from 0730 to 1600, approx 14 mi E. Extreme ctn advised within a circular area having a radius of 3 mi centered at lat 29-44-00, long. 95-07-30. (7-29)
HOUSTON ARPT: E/W Rnwy open E take-offs only. Use pavement only - soft shoulders. 38' unlgtd p-line parallel to and 1000' W of W bndry. 70' mrkd twr being erected center S edge of fld. Const apch zone NE end NE/SW Rnwy. Equip on fld. (1-2)
JOAQUIN-RADIO: Aural nulls, erratic oscillation in 10 mi radius of VAR stn. (6-27)
KELLY AFB (SAN ANTONIO): Acft with final destination of Lackland AFB, clear to Kelly and indicate Lackland in remarks section of Form 23. (1-27) Lmtd quarters trans acft. (11-3) Rnwy 9-27 clsd. (1-9)
KINGSVILLE (NORTH) ARPT: Const on rnwys. (1-3)
LACKLAND AFB: Acft with final destination of Lackland AFB, clear to Kelly and indicate Lackland in remarks section of Form 23. (1-27)
MARFA-RADIO: About Jan 29, visual-aural rng will be shut down until approx April 23, for conversion to omnirng. (1-8)
MIDLAND AIR TERMINAL: Ctn - const. (11-2)
MINERAL WELLS ARPT: Rnwy lgts 13-31 inop. (1-8)
PERRIN AFB (SHERMAN): During IFR lcl flying conducted up to and incig 8000' 50 mi radius N, E, and S, 25 mi radius W. (1-12)
POTEET ARPT: 145' rdo twr being erected 3.5 mi SE (128° T) at lat 28-59-50, long. 98-32-05. (12-21)
REESE AFB (LUBBOCK): Ctn - exten const. Rnwys 2-20, 7-25 clsd (const). (12-18) Inten student trng. (1-5)
ROCKPORT-ARANSAS CO. ARPT: 151' obst lgtd derrick being relctd 5080' NW. (9-21)
SAN ANGELO: Hvy pilot trng in vcnty. (11-6)
SAN ANGELO-MATHIS FLD: Ctn - open ditches. Equip on fld 0800-1700 Mon thru Fri. (12-19)
SAN ANTONIO ARPT: Const on ramp and taxiway W and NW of Admin Bldg, mrkd. Equip NW end Rnwy 12-30. (10-3)
TEMPLE-DRAUGHON-MILLER ARPT: 400' NW end Rnwy 15-33 clsd (const). (11-22)
WICHITA FALLS-KELL/SHEPPARD AFB: No over-run off ends of rnwys - do not land short. Longest usable rnwy 5500'. Ctn - swell in pavement 1190' S end Rnwy 35R. 3200' SE end Rnwy 12-30 clsd. Ctn - intsxn Rnwys 2-20, 12-30 soft spots. (1-8)
WINK-RADIO: LF rng 260 kc operg gnd-check only. (11-9)
UTAH: CEDAR CITY ARPT: Const 125' E Rnwy 18-36, 400' S Rnwy 8-26 and 75' W N/S Taxi Strip. Use rnwys, taxiways only. Code bcn burning but not keying. (11-17)
DELTA ARPT: Rnwy lgts 16-34 inop. (1-8)
HILL AFB (OGDEN): Ctn - const S end Rnwy 16-34. (12-6)
TOOELE: Demolition of explosives being conducted in area approx 3 mi SW, Mon thru Fri each week, and will cont indefinitely. Area is bounded as follows: N bndry - lat 40-31-04; S bndry - lat 40-29-36; E bndry - long. 112-20-53; W bndry - long. 112-22-23. (10-17)
TOOELE ARPT: NW/SE Strip clsd (const). (10-17)
VERMONT: BURLINGTON ARPT: Vermont NG P-47's use NW/SE Rnwy only. (5-23) Turf lndg area clsd. (12-1)
••CASTLETON-RUTLAND SEAPLANE BASE: Elev: 411'. (12-15)
RUTLAND ARPT: Wind tee tied to rnwy to be used during Colonial Airlines lndgs and take-offs. Rnwy may be cross-wind at these times. (9-11)
VIRGINIA: BLACKSTONE AAF: Unlgtd wind sock installed 350' SW and wind tee installed 700' SW of intsxn E/W Rnwy and N/S Taxi Strip. E/W Rnwy clsd. Bulges on NE/SW, NW/SE and N/S Rnwys mrkd but unlgtd. Keep to NW side NE/SW, NE side NW/SE and center of N/S Rnwys. All rnwy lgts inop except few N end N/S Rnwy. Mil maneuvers in progress daily Mon-Fri 0900-1130, 1300-1630. Non-rdo equipped acft circle arpt 3 times and rdo equipped acft etc Blackstone Rdo before attempting to lnd. (11-29)
BRISTOL, BCN SITE 27, BRR-DCA: Soon, bcn flashes will be changed from 6 to 12 clear per min. Course lgts will be red. (1-2)
CHARLOTTESVILLE-UNIVERSITY OF VA. ARPT: S portion of fld soft. 3000' of N/S Strip usable by sing-eng acft under 4000 lbs. Lnd within mrkrs only. (1-2)
CHINCOTEAGUE NAF: White bcn opers ngts. Use rnwys, taxi strips only, soft shoulders. Pilotless rdo-ctld acft operg days, Mon thru Fri. Other acft in vcnty, ctn. Red rot. bcn opers when fld clsd. It is also turned on when fld is under positive ctl for opers of rdo-ctld acft, target tows, and similar hazardous opers. Obst lgtd 1400' 190° from end Rnwy 4 inop. (1-6) No taxiway lgtg avail. (1-18)
DAHLGREN NAF: Acft to or from this fld file and close flgt plans with MCAS Quantico while airborne. (7-18)
DANVILLE-RADIO: Omnirng radials 30° thru 180° to 230° usable dist 40 mi. (6-30)
FRONT ROYAL-RADIO: Omnirng 113.5 mc gnd-checked only. (11-27)
HAMPTON-PENINSULA ARPT: Ctn - const. (11-14)
KEYSVILLE ARPT: Fence erected N edge of strip. (1-12)
LANGLEY AFB (HAMPTON)-RADIO: S course displaced 5° W. (1-10)
LEESBURG ARPT: 10" survey stakes along each side E/W Strip. 6" open ditch at intsxn centerline NE/SW Strip with N side E/W Strip. (7-26)
LYNCHBURG-RADIO: All LF rng courses have light multiples. (1-12)
MOUNT VERNON: See special notice under District of Columbia.
••NORFOLK ARPT: NW end taxiway paralleling Rnwy 13-31 from quonset hangar to end of taxiway discontd. (1-12) All sod areas clsd. Taxying N side Rnwy 13-31, W side Rnwy 4-22 prohibited. Taxi strip between Rnwy 1-19 and Terminal Bldg clsd. (1-4)
NORFOLK NAS (EAST FLD): Equip on apch to Rnwy 28. (12-15)
QUANTICO MCAS: Const. Ditches across and alongside N/S Taxiway. (1-9)
RICHMOND-BYRD FLD-TOWER: Jan 12, ILS flgt-checked, all components operg normal. Back course not suitable for low apchs. (1-12) FLD: Const between hangars E side taxiway parallel to and E Rnwy 15-33. (9-29)
WILLIAMSBURG-SCOTT ARPT: Const on ENE end ENE/WSW Strip. (12-1)
WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes. (1-12)
BELLINGHAM-RADIO: Omnirng radial 294°, which lies over Vancouver, B. C., has a usable dist of 20 mi account course roughness at the lowest instr. alt. of 1500' MSL. Radial 40° usable dist. 35 mi; 225° usable dist 40 mi.
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate must register at CAA Commun Bldg. (6-8)
ELLENSBURG-RADIO: Omnirng radials 42°, 157°, usable 30 mi; 52° usable 45 mi.
EVERETT-PAINE FLD: Trenches adj taxiway and E/W Rnwy, mrkd. (12-19)
FAIRCHILD AFB (SPOKANE): Lmtd maint 0800-1700. (11-17)
FORKS ARPT: Ctn - const. Use taxi strip on S side of lndg strip only. (8-21)
KELSO-LONGVIEW ARPT: Taxiways clsd. N and E bndry lgts inop. (11-28)
McCHORD AFB (TACOMA): Trans billeting avail emerg only. (7-27)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., Whidbey Island NAS. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-15)
PROSSER-BEARDSLEY ARPT: Clsd ngts. Ctn - const. Arpt will be clsd to all acft intermittently. Mrkrs will be displayed. (11-16)
QUEETS: Effective Jan 28, 1951, the offshore Airspace Warning Area in vcnty will be revised and redefined as follows: Description: N bndry - lat 47-35-00; S bndry - lat 47-03-00; E bndry - long. 124-25-00; W bndry - long. 124-55-00. Altitudes: Surface to unlmtd. Time of Use: Continuous. Activity: Air-to-air and air-to-surface gunnery. Controlling Agency: Commander Fleet Air, Seattle, Wash.
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (7-11)
SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (6-23)
SEATTLE-TACOMA INTNL ARPT: Equip on fld. (9-21)

[redacted]: SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi; SW and N 30 mi each. (1-5)
SPOKANE-RADIO: Omnirng crs have wide crs roughness with signal fades or surges. (10-13)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq 201 kc. (12-21) FLD: Taxiway between Rnwy 2 and 34 clsd. Equip on fld. (12-13)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs per wheel if tire pressure is under 85 lbs; or 35,000 lbs. if tire pressure is over 85 lbs. (10-31)
WILLAPA BAY: Concurrently with the redesignation of the Queets, Wash., Airspace Warning Area on Jan 28, 1951, the offshore Airspace Warning Area in vcnty will be rescinded.
YAKIMA-RADIO: Omnirng radials 176°, usable 35 mi; 336°, 123° 40 mi; 321° 38 mi.
[redacted]: CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not ctld by twr. Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. Hazard bcns lctd each end Rnwy 14-32 oper on test basis. (10-23)
ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)
MORGANTOWN-RADIO: LF rng gnd-checked only. (11-21)
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (6-23)
WHEELING-OHIO-CO. ARPT: Turf area clsd (const). Equip on fld days. Use rnwys, taxiways only. (10-7)
[redacted]: DRUMMOND-SORENSEN ARPT: N/S Strip under const. (8-23)
GREEN BAY-AUSTIN-STRAUBEL ARPT: Snow on all rnwys. Braking action poor. (1-8)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
MADISON ARPT: Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (10-11)
MILWAUKEE-CURTIS WRIGHT ARPT: 630' FM twr being dismantled 12 mi NW (319°T) at lat 43-14-59, long. 88-11-43. (12-29)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (11-28)
OCONTO ARPT: E/W and NE/SW Strip open to wheeled acft only. (1-15)
SHAWANO ARPT: NE/SW Strip open to wheeled acft only. (1-15)
STEVENS POINT ARPT: Strips, taxiways plowed. Strips also suitable for skis. (1-10)
WAUTOMA ARPT: Apch clearing not completed. (10-13)
[redacted]: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt. beyond 35 mi.
LARAMIE-RADIO: Soon, all transmitting and rcvg fac at INSAC will be shut down. LF rng will oper unmonitored and without voice.
MOORCROFT-RADIO: Omnirng radials between 100° and 120° unusable beyond 30 mi at 9000' MSL. (8-8)
ROCK RIVER-RADIO: Omnirng operg unmonitored and without voice. (11-10)
ROCK SPRINGS-RADIO: LF rng crs monitor. device inop. (11-20)
SHERIDAN CO. ARPT: Equip on fld days. (10-6)

(OVER)

(1-16-51)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Albany	Winston-Salem	WAC 359	AP 9
Boston	WAC 262	Boston local	FC 176
Charlotte	WAC 263	21DF	

NOTE: A NEW EDITION OF RENO SECTIONAL WILL BE PRINTED IN FEBRUARY. THIS CHART WILL, THEREFORE, BE OMITTED FROM THE MARCH SCHEDULE.

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Aeronautical Charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Automatic Direction Finding approach charts, 5 cents each, by number with prefix (ADF); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

REGULATIONS OF THE ADMINISTRATOR
PART 620 - EFFECTIVE DEC. 27,1950
SECURITY CONTROL OF AIR TRAFFIC

The regulation reads in part as follows.....

SUBPART B - OPERATING RULES

620.10 Scope. Aircraft shall not be operated into or within an Air Defense Identification Zone (ADIZ) prescribed by the Administrator in Subpart C of these regulations, in violation of the following rules:

620.11 Flight Plans. Unless otherwise authorized under section 620.13, prior to penetrating and ADIZ or prior to take-off from a point within an ADIZ, a flight plan shall be filed with an appropriate aeronautical facility. Such flight plan shall contain:

(a) For IFR flights, the information specified in section 60.41 of the Air Traffic Rules of Part 60 of the Civil Air Regulations. (14 C.F.R, Part 60).

(b) For VFR flights, unless an abbreviated flight plan is authorized the information specified in paragraphs (a) through (g) inclusive and (i) and (j) of Section 60.41 of the Air Traffic Rules. (14 C.F.R., Part 60). Such a flight plan shall be designated by the pilot in command as a Defense Visual Flight Rule (DVFR) flight plan.

620.12 Reporting Points

(a) Flight within or penetrating a Domestic ADIZ or entering the United States across an International Boundary ADIZ - Unless otherwise authorized under section 620.13:

(1) IFR Flights - Position reports shall be made as required by Section 60.47 of the Civil Air Regulations. (14 C.F.R., Part 60).

(2) DVFR Flights - The pilot in command of an aircraft shall not enter an ADIZ until he has reported to an appropriate aeronautical facility either (a) the estimated time, position and altitude at which he will penetrate the ADIZ or (b) the time, position and altitude at which the aircraft passed the last reporting point along the flight path of the aircraft prior to penetration of an ADIZ and his estimated time over the next reporting point along the intended flight path of the aircraft.

NOTE: Whenever it shall appear that the previously filed estimate is in error, as to time by more than five minutes, or as to position by more than 20 miles, a corrected estimate shall be filed with an appropriate aeronautical facility.

(b) Aircraft entering the United States through a Coastal ADIZ:

(1) United States aircraft - The reports prescribed in paragraph (a) of this section are required.

(2) Foreign aircraft - Prior to entering the United States, Foreign aircraft shall (A) make position reports as prescribed for United States aircraft in paragraph (1) above or (B) in lieu thereof, the pilot in command of a foreign aircraft operating under either Instrument of Visual Flight Rules shall report to an appropriate aeronautical facility when the aircraft is not less than one hour and not more than two hours average cruising distance via the most direct route, from the United States. Thereafter, reports shall be made as instructed by the facility receiving the original report.

NOTE: Operators of foreign aircraft who exercise the optional position reporting method described in subsection (B) above are cautioned that this procedure does not eliminate the position reporting requirements prescribed for the control of air traffic.

620.13 Authorized Exceptions:

(a) Intra-Zone VFR flights. A CAA airways operation facility exercising security control may, under certain conditions, authorize VFR flights which are wholly within the boundaries of an ADIZ, or from points within an ADIZ to points outside thereof, without compliance with the flight plan and reporting requirements of sections 620.11 and 620.12. Such flights shall be operated in accordance with the instructions, if any, issued at the time the authorization is granted.

(b) Altitude Limitations. The provision of sections 620.11 and 620.12 are not applicable to aircraft operating within the Knoxville, Albuquerque, Los Angeles, San Francisco and Northwest Air Defense Identification Zones at altitude less than 4,000 feet above the immediate terrain or to aircraft entering these same Air Defense Identification Zones from within the continental limits of the United States at altitudes less than 4,000 feet above the immediate terrain.

620.14 Air Defense Security Instructions. Under emergency defense conditions which may involve the national security, aircraft shall be operated into or within an ADIZ in accordance with such additional special security instructions issued by the Administrator as may be deemed necessary for the identification, location and control of the particular flight.

NOTE: Such instructions will be designated as "Air Defense Security Instructions." Emergencies involving the national security may require the exercise of special control for identification purposes. In such cases instructions may be issued requiring identification turns, flight in a specified direction or location, or such other instructions as may be necessary.

620.15 Adherence to DVFR Flight Plans and Air Traffic Clearances

(a) IFR Flights -

(1) Within Control Zones and Areas - No deviation shall be made from an IFR flight plan unless an amended clearance is obtained from CAA air traffic control through an appropriate aeronautical facility as provided in the air traffic rules, section 60.21 of the Civil Air Regulations (14 C.F.R. 60, as amended).

(2) Outside Control Zones and Areas - When a flight is conducted in accordance with IFR within or into an ADIZ where an air traffic clearance is not required by the Civil Air Regulations, no deviation from the flight plan, as filed, shall be made unless prior notification is given to an appropriate aeronautical facility.

(b) DVFR Flights - No deviation shall be made from a DVFR flight plan unless prior notification is given to an appropriate aeronautical facility.

620.16 Emergency Situations. In emergency situations which require immediate decision and action for the safety of the flight, the pilot in command of the aircraft may deviate from the provision of this part to the extent required for such emergency. When a deviation is exercised the pilot in command shall report such deviation and the reasons therefor, as soon as practicable to an appropriate aeronautical facility.

620.17 Radio Failure

(a) IFR Flights - In case of the failure of two-way radio communications, the pilot in command of the aircraft shall take the action required by Section 60.49 of the Civil Air Regulations. (14 C.F.R. Part 60 as amended).

(b) DVFR Flights - In case of the failure of two-way radio communications the flight may proceed in accordance with the original DVFR flight plan and the pilot in command of the aircraft shall make a report of such failure, as soon as possible, to an appropriate aeronautical facility.

620.18 Violations. In addition to the penalties otherwise provided for by the Civil Aeronautics Act of 1938, as amended, any person who knowingly or willfully violates any provision of the regulations prescribed in this part, or any order issued thereunder shall be deemed guilty of a misdemeanor and upon conviction thereof, shall be subject to a fine of not exceeding $10,000 or to imprisonment not exceeding one year, or to both such fine and imprisonment.

Washington 25, D.C. - Price 25 cents per copy, $6.00 per year.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30 minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
\# = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
* = Air Force guard 4495,4765 kc and 121.5 mc
(D) = Day. (N) = Night.
→ = New or revised data.
/ = New facilities or name changes, see page 3.

INSTRUMENT LANDING SYSTEMS

GP = Glide Path
L5 = Instrument Approach (neon)
L7 = Hi-intensity Approach Lgts
(W) = Without voice

→ = New or revised data
+ = additional data will be found in Notices to Airmen section.
(BC-unusable) = Back course unusable

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC. and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE. Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
V = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W. . . . Without voice facilities
Z. . . . VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105. 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
'ission of B indicates rotating light is not available.

NOTE. 'e lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

Effective January 1, 1951, all Navy range stations, control towers and GCA units in the continental United States, discontinued the use of 3117.5 kc.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)

Guard.....121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W. 109.1				
X...109.5				
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion. Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements

---

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL J.[illegible] - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, California.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif..; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt, D.C.; Selfridge AFB, Mich.; Westover AFB, Mass.; Mitchel AFB, N.Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala., Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich., Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by MATS and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listings given in paragraph 5 of this Regulation. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11).

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, August 8, 1950; Teletype Maps: M-11, December 1, 1949, and M-14 April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C" and "O"); M-59, November 5, 1949 (Service "B").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

IMPLEMENTATION OF 136.80 MC IN CHANNEL "G". Use of 136.80 mc to replace 137.70 mc as GCA Search Control Frequency in "G" Channel was implemented December 1, 1950. Frequency 137.70 mc was retained in GCA units for a period of 30 days after implementation of 136.80 mc. Frequency 136.80 mc was implemented at VHF/DF stations within the continental U. S., replacing 137.70 mc on December 1, 1950, and will be used on a secondary basis as a common VHF/DF training frequency. (Where VHF/DF and GCA facilities are within interference rng of each other, routine navigational VHF/DF aid will be furnished on Channel G on a secondary basis, emergency VHF/DF aid will be on 121.5 mc, and tactical or training frequencies avail. will be used whenever possible. Pilots and operators engaging in VHF/DF training will monitor G channel before transmitting so as not to interfere with GCA transmission.) Secondary uses of 137.70 mc by tactical organizations will be conducted on 136.80 mc after implementation.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

IMPLEMENTATION OF 135.90 MC AS CAA AIRWAYS FREQUENCY: Use of 140.58 mc as CAA airways stn freq will be discontd on March 1, 1951, and use of 135.90 mc will be implemented. In order to improve communications on Channel A, simplex operation on USAF acft will be changed to single channel duplex operation at that time for this channel; a receiving crystal on 135 mc and a transmitting crystal on 135.90 mc will be installed in Channel A to replace 140.58 mc. Navy and Coast Guard aircraft will continue to operate on a simplex basis and the frequency of 135.90 mc will replace 140.58 mc in Navy Channels 1 and D and Coast Guard Channel gd-D (or 1 in equipment modified for 18 channels). CAA airways stations will transmit on freq of 135 mc and receive on 135.90 mc for USAF acft; and in the case of Navy and Coast Guard acft will transmit and receive on 135.90 mc.

CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-15 dtd Sept 28, 50, Allentown, Pa. (Allentown-Bethlehem Arpt). Initial apch: E - 2500' from intsxn NE crs Willow Grove rng. Missed apch: Climb to 2500' on SW crs within 15 mi.

(2) AL-134 dtd Dec 11, 50, El Paso, Tex. (International). Procedure turn: S side E crs 6500' within 10 miles, NA beyond 10 miles. Distance rng sta to arpt: 4.5 miles.

CIVIL SPECIAL NOTICES

CIVIL DATA: The airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information. as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereat.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of complicance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Oakland Center	120.3 mc	October 30, 1950
Chicago Center	119.5 mc	May 10, 1949
Washington Center	120.3 mc	September 1, 1949
New York Center	120.7 mc	January 25, 1950
	120.3 mc	October 11, 1950
Atlanta Center	120.7 mc	July 1, 1950
Pittsburgh Center	118.7 mc	November 2, 1950
Detroit Center	119.1 mc	December 21, 1950
Cleveland Center	120.3 mc	November 3, 1950

DANGER AREA VIOLATIONS (CAMP CAMPBELL, KY.): It has been reported that frequent violations by aircraft, both military and civil, have been observed over this area. It must be emphasized to all pilots that this practice may result in tragic consequences. Recent months have brought intensified training here with artillery fire reaching a maximum ordinate of 10,000' . Subject area is located NW of Clarksville, Tenn. and is depicted on aeronautical charts and described in the Flight Information Manual.

MAGNETIC VARIATION CHANGES: The application of 1950 isogonic lines to aeronautical charts will cause the magnetic variation at the station of certain radio ranges to be changed, necessitating a change in the magnetic bearings of the courses. The following locations are affected. The new magnetic courses for these ranges are shown in the listings in the Air Navigation Radio Aids section.

Station	Old Var.	New Var.	Station	Old Var.	New Var.
Albuquerque New Mexico	14 E	13 E	Macon Georgia	2 E	1 E

AERONAUTICAL CHART CORRECTION: Correct RF 56 to show McComb, Miss. guards 4495 kc.

FLIGHT INFORMATION MANUAL CORRECTION: Correct page 14 of the Flight Information Manual to show telephone number of Palacios Insac as 3071.

AIRMANS GUIDE CORRECTION: Correct Volume 5, No. 22, page 81, Control Zones, as follows: Item 1, retain 5 mi. control zone at Bedford Mass, but correct name of airport from Bedford Municipal to Lawrence G. Hanscom Field. Item 8, change to read "New Bedford, Mass within 5 mi. radius of New Bedford Municipal Airport extending 2 miles either side of ILS localizer course to 10 mi. southwest of localizer". Item 9, change Anchorage, Alaska Control Zone to a 10 mi. radius of the Anchorage International Airport.

ON-REQUEST REPORTING POINT: Effective immediately the El Segundo on-request reporting point is designated as the intersection of the SW crs of Burbank, Calif. and the W crs of Los Angeles, Calif. (VAR).

INSTRUMENT APPROACH PROCEDURES: The very high frequency radio range standard instrument approach procedure for the Municipal Airport, Ottumwa, Iowa has been CANCELLED, effective January 12, 1951.

DANGER AREA DESIGNATIONS: The following Danger Area amendment shall become effective as dated, unless otherwise advised:

AMENDMENT NO. 64 (January 28, 1951)

1. A Milford, Delaward, area is added to read: Location: Milford (Washington Chart); Description: A circular area with a 3 mile radius, centered at lat. 38°54'00" N, long. 75°16'00"W; Altitudes: Surface to 20,000 ft.; Time: Daylight hours only (when ceiling is at least 5000 ft. and visibility is 3 miles or better); Using Agency: ComNab, 4th Naval District, Atlantic City NAS, New Jersey.

2. The Camp Atterbury, Indiana, area, published on April 21, 1949, in 14 F.R. 1913, and amended on May 26, 1950, in 15 F.R. 3188, and on June 27, 1950, in 15 F.R. 4112, is revised to read: Location: Camp Atterbury (Cincinnati Chart); Description: N boundary: lat. 39°21'30"N; E boundary: long. 85°59'30"W; S boundary: lat. 39°13'00"N; W boundary: long. 86°06'00"W; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: 2nd Army, Camp Atterbury, Indiana.

3. A Devils Lake, North Dakota, temporary area, is added to read: Location: Devils Lake (Minot and Fargo Charts); Description: N boundary: lat. 48°09'00"N; S boundary: lat. 47°58'45"N; E boundary: long. 98°55'20"W; W boundary: long. 99°07'20"W; Altitudes: Surface to unlimited; Time: Continuous, January 28, 1951 through March 15, 1951; Using Agency: Climatic Test Detachment, Devils Lake, N. Dakota.

4. An Olympic Peninsula, Washington, area is added to read: Location: Olympic Peninsula (Seattle Chart); Description: N boundary: lat. 48°00'00"N; E boundary: long. 123°15'00" W; S boundary: lat. 46°15'00"N; W boundary: Continental coastline; Altitudes: 15,000 ft. MSL to 35,000 ft. MSL; Time: Continuous; Using Agency: 325th Fighter, All-Weather Wing, McChord AFB, Washington.

5. The Camp McCoy, Wisconsin, area, published on April 21, 1949, in 14 F.R. 1913, is amended by changing the "Designated Altitudes" column to read: "Surface to unlimited".

WEATHER REPORTING SERVICE

These notices are being discontinued on a trial basis since it is believed a requirement no longer exists for publication of this information in "Airman's Guide". Subscribers wishing the notices resumed should write to the Chief, U. S. Weather Bureau, Washington 25, D. C., Attention Synoptic Section. If the demand and justification for reinstatement of the notices are sufficient, appropriate action will be taken.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA : ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (1-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (1-30) Data rcvd too late for inclusion of + in Directory of Arpts.
BANKS, BCN SITE 35, MEM-TPA: About Feb 15, 24" single end clear 12 rpm bcn with red crs lgts flash. char 5 dot dash dot will be comm. (1-27)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (12-5) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)

ALABAMA: BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will letdown S of Mobile to avoid Bates Fld and G-6 Arwys tfc. (1-29)
HUNTSVILLE ARPT: Use N/S Rnwy only. (1-12)
**LAFAYETTE ARPT: Correct: Lat 32-55-00, long. 85-23-15. (11-8)
LANETT, BCN SITE 35, MSY-ATL: About Feb 15, site will be perm discontd. (1-27)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MUSCLE SHOALS-RADIO: About Feb 8, omnirng will be shut down until approx April 8. (1-23)
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (1-3)
NOTASULGA, BCN SITE 32, MSY-ATL: About Feb 15, 24" single and clear 6 rpm bcn with red crs lgts flash. char 2 dot dot dash will be comm. (1-27)
TUSCALOOSA-VAN DE GRAAFF ARPT: NW/SE Strip under const, mrkd. Lnd, take-off N of this area and cross const at mrkd taxiway only. (1-4)
ARIZONA: ARIZONA-SPECIAL NOTICE: Lndg of acft on highways of Colorado Riv Indian Reservation prohibited by law. (6-22)
ADAMANA, BCN SITE 52, LAX-AMA: Soon site will be perm discontd. (1-16)
DATELAND AF AUX (AZTEC)-RADIO: USAF X-Band radar bcn inop. (1-19)
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (6-27)
**FLORENCE JUNCTION ARPT: New Fld. Lat 33-15-15, long. 111-20-45. (11-10)
PHOENIX-SKY HARBOR ARPT: Use rnwys only. Ctl twr being erected approx 800' N of intsxn of Rnwy 12-30 and N/S Taxiway. Ctn - equip crossing taxiway. Rnwy 12-30 clsd. (12-1)
SANTAN, BCN SITE 2, PHX-ELP: Soon site will be perm discontd. (1-17)
TOMBSTONE, BCN SITE 16, PHX-ELP: Soon site will be perm discontd. (1-16)
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (1-4)
BENTONVILLE ARPT: Strip under const. Use taxi strip for lndg. (1-4)
BRINKLEY ARPT, SITE 37, DAL-LOU: Clsd ngts. Water in center of strip intsxn. Rows of dirt on SW end NE/SW Strip. (1-4)
**CAMDEN-HARRELL ARPT: 210' obst lgtd rdo antenna erected 5 mi SW (230°T) at lat 33-34-35, long. 92-49-52. (1-11)
**CROSSETT ARPT: 180' obst lgtd rdo twr erected 6 mi SW (230°T) at lat 33-07-26, long. 91-57-42. (1-2)
LITTLE ROCK-ADAMS ARPT-TOWER: Transmitting and rcvr poor on all VHF freq S to W account obsts near temp twr until approx Mar 1, 1951. (12-13) Apch ctl on 353 kc shut down until approx Feb 27. (11-27) FLD: Use ctn lndg NE or N, vision of ctl twr partially obstructed. (12-21) Lmtd NG svcg avail. (10-24)
PINE BLUFF-RADIO: About Jan 29, visual-aural rng will be shut down until approx April 23 for conversion to omnirng. (1-8)
★WALNUT RIDGE-RADIO: Omnirng on 115.7 mc resumed oper. Gnd checked only. (1-29) These data rcvd too late for inclusuion on ANRA page.
CALIFORNIA: BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
**CAMP ROBERTS: A Temporary Controlled Firing Area has been estab in the vcnty. Area is described as follows: Beginning at lat 35-50-45, long. 120-43-30; S to lat 35-43-45, long. 120-44-30; due W to long. 120-48-15; NW to lat 35-46-30, long. 120-51-30; NE to lat 35-50-45, long. 120-47-45; due E to point of beginning. Activities: Artillery and mortar firing. Time of Use: Daylgt hrs. Using Agency: 6th Army, Camp Roberts, Calif. Effective Date: Jan 19, 1951, thru July 19, 1951.
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable - use for homing only. X-band radar bcn (AN/CPN-6) unreliable. (1-9)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (11-9)
CLIPPER GAP, BCN SITE 11A, SFO-SLC: Soon site will be perm discontd. (1-17)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRONESE LAKE, BCN SITE 16, LAX-SLC: Soon site will be perm discontd. (1-16)

CALIFORNIA: CULVER CITY-HUGHES ARPT: 6500' of strip under const, mrkd. Area avail to acft under 30,000 lbs. gross. (1-4)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C.G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-3)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (1-1)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAMILTON AFB-RADIO: Temp compass locator operg on 219 kc has been installed at lat 38-02-56, long. 122-29-44. Oper with voice and ctld by twr. Bear, dist to Rnwy 30: 300°, 1300'. Oper cont (12-16)
HAMILTON AFB (SAN RAFAEL): Ctn - const on Rnwy 12-30. (9-21)
HAYWARD ARPT. Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (1-3)
LONG BEACH-EAST LONG BEACH ARPT: Strip 21 under const. Use oiled area for lndg and take-offs. (1-8)
LOS ANGELES INTNL ARPT-TOWER: Nov 10, new temp ILS lclzr, channel "Y" 109.9 mc comm, serving Rnwy 25L. Ident: LAX. Course aligned on centerline at apch end Rnwy 25L. (1-18) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. Equip on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily except Sat. and Sun. (1-18)
**LOS ANGELES-SAN FERNANDO VALLEY ARPT: 55' obst lgtd ctl twr erected 800' N of existing twr. Old twr not obst lgtd. (1-17)
MANIX, BCN SITE 14, LAX-SLC: Soon site will be perm discontd. (1-16)
MARCH AFB (RIVERSIDE)-RADIO: USAF VHF/DF oper: 0800-0200 daily. (1-2)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (10-3)
MONTEREY-PENINSULA ARPT: Equip end Rnwy 28. Observe twr for lgts in addition to rdo clearance. (2-1)
NOVATO ARPT: Four 500' twrs Rdo Stn KCBS being erected 1.5 mi E (103°T) at lat 38-08-20, long. 122-31-35. (1-4)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. New hi-intensity apch lgt lane Rnwy 9L-27R operg on test basis. (1-5)
REDDING, BCN SITE 20, SFO-SEA: Soon site will be perm discontd. (1-16)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. No opers Sat, Sun, or holidays. (1-4)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (9-28)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO-RADIO: Omnirng on 117.6 mc may be unreliable due to const of pipeline in vcnty of transmitter. Limited communication possible on 122.1 mc because of blocking interference from another freq. (1-26)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip on fld. (1-26)
SAN JOSE, BCN SITE 32, LAX-SFO: Soon site will be perm discontd. (1-16)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end of Rnwy 25 perm clsd to acft with 20,000 lbs. or more gross wt. (5-30)
SANTA MONICA ARPT: Ctn - one medium intensity rnwy lgt 17" above gnd on S side Rnwy 21, 800' from E end, operg on test basis. (12-4)
TROY, BCN SITE 14, LAX-AMA: Soon site will be perm discontd. (1-16)
UKIAH-RADIO: Omnirng on 112.3 mc shut down. (1-12)
UKIAH ARPT: Delete. Data rcvd too late for deletion of + in Directory of Arpts. (1-29)

COLORADO: **AKRON INT FLD: 250' obst lgtd twr erected 5.5 mi NW (303°T) at lat 40-09-34, long. 103-16-07. (1-8)
COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. LEESBURG ARPT: 10" survey stakes along each side E/W Strip. 6" open ditch at intsxn centerline NE/SW Strip with N side E/W Strip. (7-26)
MOUNT VERNON: See special notice under District of Columbia.
NORFOLK ARPT: All sod areas clsd. Taxying N side Rnwy 13-31, W side Rnwy 4-22 prohibited. Taxi strip between 1-19 and Terminal Bldg clsd. (1-4)

VIRGINIA: ★NORFOLK NAS-RADIO: Navy homing fac comm W course Norfolk rng at lat 36-56-12, long. 76-35-25. Freq: 209 kc. Ident: "NGU". Oper cont. Bear, dist to rng: 96°,17.1 mi.(nautical). Class: MHW. (1-16) Eclipse FM has been relctd to site of new MH fac. Serviceable, but not flight-checked. (1-26)

NORFOLK NAS (EAST FLD): Equip on apch to Rnwy 28. (12-15)
QUANTICO MCAS: Const. Ditches across and alongside N/S Taxiway. (1-9)
RICHMOND-BYRD ARPT: Const between hangars E side taxiway parallel to and E Rnwy 15-33. (9-29)
TAPPAHANNOCK ARPT: Dangerous holes in center, ends and edges of strip. (1-23)
WILLIAMSBURG-SCOTT ARPT: Const on ENE end ENE/WSW Strip. (1-24)

WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes. (1-12)
BELLINGHAM-RADIO: Omnirng radial 294°, which lies over Vancouver, B. C., has a usable dist of 20 mi account course roughness at the lowest inst alt. of 1500' MSL. Radial 40°, usable dist. 35 mi; 225° usable dist 40 mi.
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate must register at CAA Commun Bldg. (6-8)
ELLENSBURG-RADIO: Omnirng radials 42°, 157°, usable 30 mi; 52° usable 45 mi.
EVERETT-PAINE FLD: Trenches adj taxiway and E/W Rnwy, mrkd. (12-19)
FAIRCHILD AFB(SPOKANE): Lmtd maint 0800-1700. (11-17)
FORKS ARPT: Ctn - const. Use taxi strip on S side of lndg strip only. (8-21)
KELSO-LONGVIEW ARPT: Taxiways clsd. N and E bndry lgts inop. (11-28)
★LARSON AFB (MOSES LAKE)-RADIO: USAF VHF/DF oper on trng status only. (1-23)
McCHORD AFB (TACOMA): Trans billeting avail emerg only. (7-27)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., Whibbey Island NAS. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-15)
PROSSER-BEARDSLEY ARPT: Clsd ngts. Ctn - const. Arpt will be clsd to all acft intermittently. Mrkrs will be displayed. (11-16)
QUEETS: Effective Jan 28, 1951, the offshore Airspace Warning Area in vcnty will be revised and redefined as follows: Description: N bndry - lat 47-35-00; S bndry - lat 47-03-00; E bndry - long. 124-25-00; W bndry - long. 124-55-00. Altitudes: Surface to unlmtd. Time of Use: Continuous. Activity: Air-to-air and air-to-surface gunnery. Controlling Agency: Commander Fleet Air, Seattle, Wash.
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (7-11)
SEATTLE NAS: Acft in tfc are restd from flgt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (6-23)
SEATTLE-TACOMA INTNL ARPT: Equip on fld. (9-21)
SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi, SW and N 30 mi each. (1-5)
SPOKANE-RADIO: Omnirng crs have wide crs roughness with signal fades or surges. (10-13)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq 201 kc. (12-21) FLD: Taxiway between Rnwy 2 and 34 clsd. Equip on fld. (12-13)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs. per wheel if tire pressure is under 85 lbs; or 35,000 lbs. if tire pressure is over 85 lbs. (10-31)
WILLAPA BAY: Concurrently with the redesignation of the Queets, Wash., Airspace Warning Area on Jan 28, 1951, the offshore Airspace Warning Area in vcnty will be rescinded.
YAKIMA-RADIO: Omnirng radials 176°, usable 35 mi; 336°, 123° 40 mi; 321° 38 mi.

[redacted]: CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not ctld by twr. Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. Hazard bcns lctd each end Rnwy 14-32 oper on test basis. (1-25)
ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)
**MARTINSBURG ARPT: 154' obst lgtd twr Rdo Stn WEPM erected 4 mi N (350°T) at lat 39-27-50, long. 77-59-07. (1-9)

WEST VIRGINIA: MORGANTOWN-RADIO: LF rng gnd-checked only. (11-21)
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough.
WHEELING-RADIO: About Feb 7, CAA ILS MM, LMM, OM, LOM will be comm. LMM freq: 230 kc, ident: LG. LOM freq: 275 kc, ident: HL. Modulation and keying interrupted for stn voice transmission. Concurrently with the comm of LOM, low freq stn transmitter on 326 kc will be decomm. (1-25)
WHEELING-OHIO CO. ARPT: Turf area clsd. Equip on fld days. Use rnwys, taxiway only. (1-26)
★WHITE SULPHUR SPRINGS-GREENBRIER ARPT-TOWER: Private twr comm on 278 kc guards 3105 kc. Oper 0800-sundown. (1-29) These data rcvd too late for inclusion on ANRA page.

WISCONSIN: DRUMMOND-SORENSEN ARPT: N/S Strip under const. (8-23)
**EAU CLAIRE ARPT: Dec 26, 1950, 350' obst lgtd twr Rdo Stn KSB-677 erected 4.5 mi SSE (165°T) at lat 44-48-05, long. 91-27-45.
GREEN BAY-AUSTIN-STRAUBEL ARPT: Snow on all rnwys. Braking action poor. (1-8)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
MADISON ARPT: Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (1-21)
MARSHFIELD ARPT: E/W Rnwy plowed 100 x 2300'. Snow bank N edge. Rest of fld open to ski-equipped acft only. (1-12)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (11-28)
OCONTO ARPT: E/W and NE/SW Strips open to wheeled acft only. (1-15)
SHAWANO ARPT: NE/SW Strip open to wheeled acft only. (1-15)
STEVENS POINT ARPT: Strips, taxiways plowed. Strips also suitable for skis. (1-10)
WAUTOMA ARPT: Apch clearing not completed. (10-13)

WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt. beyond 35 mi.
FT. BRIDGER INT FLD: Ctn - snow, ice. Use harrowed strip only. Strip approx 275 x 4500' running E/W parallel NE bndry. 12" snow drifts on rest of fld. (1-25)
KEMMERER ARPT: Open to ski-equipped acft only. (1-29)
MOORCROFT-RADIO: Omnirng radials between 100° and 120° unusable beyond 30 mi at 9000' MSL. (8-8)
**SHOSHONI ARPT: Correct lat 43-15-00, long. 108-07-30. (1-26)

(1-30-51).

AMENDMENTS TO CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES AND REPORTING POINTS. Effective 0001 EST, February 20, 1951, unless otherwise advised, civil airways, control areas, control area extensions, control zones are amended in whole or in part as follows:

Civil Airways: Blue civil airway No. 69 is amended to read: (St. Louis, Mo., to Des Moines, Iowa). From the St. Louis, Mo., omnirange station via the Quincy, Ill., omnirange station; Ottumwa, Iowa, omnirange station to the Des Moines, Iowa, omnirange station.

Control Areas: 1. Green civil airway No. 4 control areas (Los Angeles, Cal., to Philadelphia, Pa.) is amended by changing the last sentence to read: From the Wichita, Kansas, omnirange station to the Emporia, Kans., omnirange station via the direct enroute radials and the Wichita omnirange 15° north altitude change radial to its intersection with the Hutchinson, Kans-Emporia, Kans. omnirange direct enroute radials including all that area bounded on the north by the Hutchinson-Emporia direct enroute radials, on the south by the Wichita-Emporia direct enroute radials and on the west by the Wichita 16° north altitude change radial; Emporia, Kans., omnirange station to the Kansas City, Mo., omnirange station via the direct enroute radials; Kansas City, Mo., omnirange station to the Columbia, Mo., omnirange station via the direct enroute and 15° north and south altitude change radials; Columbia, Mo., omnirange station to the St. Louis, Mo., omnirange station via the direct enroute and 15° north altitude change radials.

2. Red civil airway No. 12 control areas, is amended to read (Kansas City, Mo., to Williamsport, Pa.). All of Red civil airway No. 12 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Kansas City, Mo., omnirange station to the Kirksville, Mo., omnirange station via the direct enroute and 15° north and south altitude change radials; Kirksville, Mo., omnirange station to the Burlington, Iowa, omnirange station via the direct enroute and 15° south altitude change radials.

3. Red civil airway No. 35 control areas (Pueblo, Colo., to Wichita, Kans.), is amended by adding a last sentence to read: "Hutchinson, Kans., omnirange station to Emporia, Kans., omnirange station via the direct enroute and 15° north altitude change radials."

4. Red civil airway No. 89 control areas, is amended to read: (St. Joseph, Mo., to Peoria, Ill.) All of Red civil airway No. 89 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Kirksville, Mo., omnirange station to the Quincy, Ill., omnirange station via the direct enroute and 15° south altitude change radials.

5. Blue civil airway No. 13 control areas, is amended to read: (Houston, Tex., to Minneapolis, Minn.). All of Blue civil airway No. 13.

6. Blue civil airway No. 69 control areas, is amended to read: (St. Louis, Mo., to Des Moines, Iowa). All of Blue civil airway No. 69 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the St. Louis, Mo., omnirange station to the Quincy, Ill., omnirange station via the direct enroute and 15° east altitude change radials; Quincy, Ill., omnirange station to Ottumwa, Iowa, omnirange station via the direct enroute and 15° east altitude change radials; Ottumwa, Iowa omnirange station to Des Moines, Iowa, omnirange station via the direct enroute and 15° south altitude change radials on the south and by the intersection of the Ottumwa omnirange 300° magnetic and Des Moines 78° magnetic radials.

Control Area Extensions: 7. Control area extension is added to read: (Moses Lake, Wash.) All that area within a 30 mile radius of the Larson AFB, Moses Lake, Wash., excluding the portions which overlap Green Civil Airway No. 2, the Moses Lake Danger Area and the Hanford Airspace Reservation.

8. Control area extension Bowling Green, Ky., is amended by adding the following to the present designation: "and extending 5 miles either side of the northwest course of the Bowling Green radio range to a point 25 miles northwest of the range station."

9. Control area extension, is added to read: (Mt. Clemens, Mich.). From the Selfridge AFB radio range station extending 5 miles either side of the north course of the radio range to a point 50 miles north of the radio range station, including all that area bounded on the south by Red 1, on the west by Red 20, on the north by Red 63 and on the east by the International Boundary (St. Clair River) southward to Lat. 42°27'30", Long. 82°44'40".

10. Control area extension, is amended to read: (Jackson, Mich.). From the Jackson, Mich., non-directional radio beacon extending 5 miles either side of a 313° True bearing from the non-directional radio beacon to a point 25 miles northwest, and all that area south of the non-directional radio beacon bounded on the north by Red 63, on the east by Red 62, on the south by Red 12, and on the west by Red 57.

Control Zones: 11. 5 mi. control zones, is amended by deleting the following airport: Tacoma, Wash.: McChord Field; and by adding the following airport: Moses Lake, Wash.: Larson AFB.

12. Control Zone, Rockford, Ill., is amended to read: Within a 5 mile radius of the Machesney Airport and within a 5 mile radius of the Greater Rockford Airport, extending 2 miles either side of a 182° mag. bearing from the Rockford radio range station to the Greater Rockford Airport, and extending 2 miles either side of the west and northwest courses of the Rockford radio range from the radio range station to points 10 miles west and northwest of the radio range station.

13. Springfield, Ill., control zone is amended by adding the following to the present designation: "and extending 2 miles either side of the 36° magnetic radial of the Springfield, Ill., omnirange from the omnirange station to a point 10 miles northeast of the omnirange station.

14. Tacoma, Wash., control zone, is added to read: Within a 5 mile radius of McChord AFB, excluding the portion which overlaps the Ft. Lewis, Wash., danger area.

15. Mt. Clemens, Mich., control zone, is added to read: Within a 7 mile radius of Selfridge AFB extending 2 miles either side of the north course of the Selfridge AFB radio range to a point 10 miles north of the radio range station.

16. Atlanta, Ga. control zone, is added to read: Within a 5 mile radius of Dobbins AFB extending 2 miles either side of the west course of the Atlanta NAS radio range from the Dobbins AFB to the Atlanta NAS control zone.

MINIMUM EN ROUTE INSTRUMENT ALTITUDE AMENDMENTS: The following amendments to minimum en route instrument altitudes will become effective on the dates indicated: Effective January 25, 1951:

1. 60.17-1 Definitions, is amended by adding: (g) "LFR" means low frequency radio range. (h) "VOR" means VHF omni range.

2. 60.17-3 Minimum Enroute Instrument Altitudes along particular routes is amended by adding: (a) (3) VOR Reception Altitudes. At certain locations VOR reception may not be assured under normal operating conditions at the minimum enroute instrument altitudes prescribed along a segment of the route. It may be necessary to fly at higher altitudes at certain points in order to be assured of adequate VOR reception. Points where VOR reception is not assured at the minimum enroute altitude under normal operating conditions will be denoted by an asterisk preceding the minimum altitude followed by the minimum VOR reception altitude.

Example: Roswell, N.Mex. Hobbs, N.Mex. *5500'

3. 60-17-3 Minimum Enroute Instrument Altitudes along particular routes is amended to read: (b) Routes. Except when necessary for taking off and landing, no person shall operate an aircraft in accordance with IFR along the routes and below the altitudes set forth in 60.17-11 through 60.17-1004, unless otherwise authorized by the Administrator.

4. Green Civil Airway No. 3, is amended to read in part:

From	To	Min. Alt.
Cheyenne, Wyo. (VOR) (LFR)	Egbert (INT), Wyo.	7,300
Egbert (INT), Wyo.	Kimball (INT), Neb.	*7,000
7,300' - Minimum continuous VOR reception altitude		
Kimball (INT), Neb.	Sidney, Neb. (VOR) (Rbn)	*5,700
7,300' - Minimum continuous VOR reception altitude		
Sidney, Neb. (VOR) (Rbn)	Chappell (INT), Neb.	*5,700
6,000' - Minimum continuous VOR reception altitude		
Chappell (INT), Neb.	Paxton (INT), Neb.	*5,000
6,000' - Minimum continuous VOR reception altitude		
Paxton (INT), Neb.	North Platte, Neb. (VOR) (LFR)	*4,300
6,000' - Minimum continuous VOR reception altitude		

From	To	Min. Alt.
North Platte, Neb. (VOR) (LFR)	Grand Island, Neb. (VOR) (LFR)	*4,200
4,300' - Minimum continuous VOR reception altitude		
Grand Island, Neb. (LFR)	Weston (INT), Neb.	2,900
Weston (INT), Neb.	Omaha, Neb. (LFR)	2,700
Grand Island, Neb. (VOR) Via radial 72	Int. N crs. Lincoln, Neb. (LFR) & Grand Island, Neb. (VOR) radial 72	3,200
Int. N crs. Lincoln, Neb. (LFR) & Grand Island, Neb. (VOR) radial 72	Omaha, Neb. (VOR) Via radial 255	2,700
Allentown, Pa.	*Bellemead (INT), N.J.	2,500
1,700' - Minimum crossing altitude at Bellemead (INT), westbound		

5. Green Civil Airway No. 4, is amended to read in part:

Albuquerque, N.Mex. (VOR)	Otto, N.Mex. (VOR)	12,000
Albuquerque, N.Mex. (VOR) Via radial 89	Otto, N.Mex. (VOR) Via radial 240	10,000
*Albuquerque, N.Mex. (LFR)	*Otto, N.Mex. (LFR)	11,000
10,300' - Minimum crossing altitude at Albuquerque (LFR), eastbound		
9,600' - Minimum crossing altitude at Otto (LFR), westbound		
Otto, N.Mex. (LFR) (VOR)	Tapia (INT), N.Mex.	9,500
Tapia (INT), N.Mex.	Anton Chico, N.Mex. (VOR)	9,000
Anton Chico, N.Mex. (VOR)	Cuervo (INT), N.Mex.	7,500
Cuervo (INT), N.Mex.	Tucumcari, N.Mex. (LFR) (VOR)	7,000
Wichita, Kans. (LFR) (VOR)	Cassoday (INT), Kans.	2,800
Cassoday (INT), Kans.	Emporia, Kans. (VOR)	*2,600
2,800' - Minimum continuous VOR reception altitude		
Emporia, Kans. (VOR)	Lebo, Kans. (LFR)	2,300
Lebo, Kans. (LFR)	Pomona (INT), Kans.	2,300
Pomona (INT), Kans.	De Soto (INT), Kans.	2,200
De Soto (INT), Kans.	Kansas City, Mo. (LFR)	2,000
Int. S crs. St. Joseph, Mo. (LFR) & Kansas City, Mo. (VOR) radial 224	Kansas City, Mo. (VOR) Via radial 224	*2,000
2,200' - Minimum continuous VOR reception altitude		

6. Green Civil Airway No. 5, is amended to read in part:

Columbus, N.Mex. (LFR) (VOR)	Harrington Ranch (INT), N.Mex.	8,500
Harrington Ranch (INT), N.Mex.	El Paso, Tex. (LFR) (VOR) Via (LFR) or (VOR) radial 258	8,500
El Paso, Tex. (LFR) (VOR) Via (LFR) or (VOR) radial 80	Salt Flat, Tex. (LFR) (VOR) Via (LFR) or (VOR) radial 260	8,000
Via (VOR) radial 65	Via (VOR) radial 275	9,000
*Salt Flat, Tex. (VOR)	Int. Salt Flat, Tex. (VOR) radial 73 & Carlsbad, N.Mex. (VOR) radial 203	10,000
8,900' - Minimum crossing altitude at Salt Flat (VOR), eastbound		
*Salt Flat, Tex. (LFR)	Guadalupe Pass, Tex. (FM)	10,000
8,900' - Minimum crossing altitude at Salt Flat (LFR), eastbound		
Guadalupe Pass, Tex. (FM)	Orla (INT), Tex. (Eastbound)	8,000
Midland (INT), Tex. (VOR)	Big Spring, Tex. (LFR) (VOR)	4,000
Big Spring, Tex. (LFR) (VOR)	Abilene, Tex. (LFR) (VOR)	4,000
Abilene, Tex. (LFR) (VOR)	Mineral Wells, Tex. (Rbn) (VOR)	3,000
Mineral Wells, Tex. (Rbn) (VOR)	Fort Worth, Tex. (LFR) (VOR)	2,500

7. Amber Civil Airway No. 2, is amended to read:

Cut Bank, Mont.	Lethbridge, Alberta, Can.	6,000

8. Amber Civil Airway No. 3, is amended to read in part:

From	To	Min. Alt.
Harrington Ranch (INT), N.Mex.	Hot Springs, N.Mex. (LFR) (VOR) Via (LFR) or (VOR) radial 149	10,000
Hot Springs, N.Mex. (LFR) (VOR) Via (LFR) or (VOR) radial 08	Albuquerque, N.Mex. (LFR) (VOR) Via (LFR) or (VOR) radial 155	10,000
Tapia (INT), N.Mex.	Las Vegas, N.Mex. (LFR) (VOR) Via (LFR) or (VOR) radial 201	9,600
Las Vegas, N.Mex. (LFR) (VOR) Via (LFR) or (VOR) radial 22 or 37	Raton, N.Mex. (VOR) Via (LFR) or (VOR) radial 202 or 187	11,000
Raton, N.Mex. (VOR)	*Trinidad, Colo. (LFR)	11,000
11,000' - Minimum crossing altitude at Trinidad, southbound		
Trinidad, Colo. (LFR)	Pueblo, Colo. (LFR)	7,500
Trinidad, Colo. (LFR)	Pueblo, Colo. (VOR)	*7,600
11,000' - Minimum continuous VOR reception altitude		

9. Amber Civil Airway No. 4, is amended to read in part:

Fort Worth, Tex. (LFR)	Int. N crs. Fort Worth, Tex. (LFR) & S crs. Oklahoma City, Okla. (LFR)	2,000
Fort Worth, Tex. (VOR) Via VOR radial 347 or 02	Ardmore, Okla. (VOR) Via VOR radial 197 or 182	2,300
Int. N crs. Fort Worth, Tex. (LFR) &S crs. Oklahoma City, Okla. (LFR)	Oklahoma City, Okla. (LFR)	2,500
Ardmore, Okla. (VOR) Via VOR radial 332 or 347	Oklahoma City, Okla. (VOR) Via VOR radial 152 or 137	2,700
Oklahoma City, Okla. (LFR)	Newalla (INT), Okla.	2,700
Newalla, Okla. (INT)	Tulsa, Okla. (LFR)	2,700
Oklahoma City, Okla. (VOR) Via VOR radial 34 or 49	Tulsa, Okla. (VOR) Via VOR radial 246 or 231	3,100
Kansas City, Mo. (LFR) (VOR)	St. Joseph, Mo. (LFR) (VOR)	2,400
St. Joseph, Mo. (LFR)	Glenwood (INT), Neb.	2,500
Glenwood (INT), Neb.	Omaha, Neb. (LFR)	2,700
St. Joseph, Mo. (VOR) Via radial 325 or 340	Omaha, Neb. (VOR) Via radial 129 or 144	2,500

10. Red Civil Airway No. 4, is amended by adding:

Albuquerque, N.Mex. (VOR) Via radial 24	Santa Fe, N.Mex. (VOR) Via radial 227	10,000
Santa Fe, N.Mex. (VOR) Via radial 71	Las Vegas, N.Mex. (VOR) Via radial 252	12,500
Via radial 86	Via radial 237	11,500

11. Red Civil Airway No. 6, is amended by adding:

Akron, Colo. Via radial 62 or 47	Imperial, Neb. Via radial 244 or 259	5,600
Imperial, Neb. (VOR) Via radial 66 or 51	Int. N crs. Hayes Center, Neb. (LFR) & Imperial, Neb. (VOR) radial 66 or 51	4,500
Int. N crs. Hayes Center, Neb. (LFR) & Imperial, Neb. (VOR) radial 66 or 51	Lexington, Neb. (VOR) Via radial 248 or 263	4,500
Lexington, Neb. (VOR) Via radial 68 or 83	Grand Island, Neb. (VOR) Via radial 234 or 249	4,000

12. Red Civil Airway No. 14, is amended to read in part:

Lone Rock, Wis. (LFR)	*New Glarus (INT), Wis.	3,100
3,100' - Minimum crossing altitude at New Glarus (INT), northwestbound		

(1-30-51)

13. Red Civil Airway No. 23, is amended by adding:

From	To	Min. Alt.
Buffalo, N.Y. (VOR)	Elmira, N.Y. (VOR)	3,500
Elmira, N.Y. (VOR)	Caldwell, N.J. (VOR)	3,500

14. Red Civil Airway No. 35, is amended to read in part:

Pueblo, Colo. (LFR) (VOR)	La Junta, Colo. (LFR)	6,000
La Junta, Colo. (LFR)	Lamar, Colo. (VOR)	*5,500
6,000' - Minimum continuous VOR reception altitude		
Lamar, Colo. (VOR)	Garden City, Kans. (LFR) (VOR)	5,500
Garden City, Kans. (LFR) (VOR)	Dodge City, Kans. (VOR)	4,000
Dodge City, Kans. (VOR)	Hutchinson, Kans. (LFR) (VOR)	4,000
Hutchinson, Kans. (LFR)	Cassoday (INT), Kans.	2,700
Hutchinson, Kans. (VOR) Via radial 101	Wichita, Kans. (VOR) Via radial 281	3,000

15. Red Civil Airway No. 45, is amended to read in part:

Baltimore, Md. (LFR)	Loch Raven (INT), Md.	1,800

16. Red Civil Airway No. 68, is amended to read in part:

Midland, Tex. (LFR) (VOR) Via LFR or VOR radial 102 or 117	San Angelo, Tex. (LFR) (VOR) Via LFR or VOR radial 282 or 267	4,300

17. Red Civil Airway No. 72, is amended to read in part:

Willow Grove, Pa. (LFR)	Bellemead (INT), N.J.	1,700

18. Red Civil Airway No. 83, is amended by adding:

Gila Bend, Ariz. (LFR)	Tucson, Ariz. (LFR) (Southeastbound)	10,000
Tucson, Ariz. (LFR)	Gila Bend, Ariz. (Northwestbound)	7,000

19. Red Civil Airway No. 88, is amended to read:

Albuquerque, N.Mex. (LFR) (VOR) Via LFR or VOR radial 112	Corona, N.Mex. (VOR) Via VOR radial 293	12,000
Corona, N.Mex. (VOR) Via VOR radial 124 or 109	Roswell, N.Mex. (LFR) (VOR) Via LFR or VOR radial 305 or 320	9,000
Roswell, N.Mex. (LFR) (VOR) Via LFR or VOR radial 104	Hobbs, N.Mex. (LFR) (VOR) Via LFR or VOR radial 285	*5,500
6,000' - Minimum continuous VOR reception altitude		

20. Red Civil Airway No. 91, is amended to read:

*Salt Flat, Tex. (LFR)	*Carlsbad, N.Mex. (LFR)	11,800
10,800' - Minimum crossing altitude at Salt Flat, Northeastbound		
8,800' - Minimum crossing altitude at Carlsbad, southwestbound		
Int. Salt Flat, Tex. (VOR) radial 73 & Carlsbad, N.Mex. (VOR) radial 203	Carlsbad, N.Mex. (VOR) Via radial 203	7,000
Carlsbad, N.Mex. (LFR) (VOR) Via LFR or VOR radial 50 or 65	Hobbs, N.Mex. (LFR) (VOR) Via LFR or VOR radial 215 or 230	5,000

21. Red Civil Airway No. 96, is amended by adding:

Big Spring, Tex. (VOR) Via VOR radial 43	Wichita Falls, Tex. (VOR) Via VOR radial 226	*3,800
7,000' - Minimum continuous VOR reception altitude		

22. Red Civil Airway No. 97, is amended to read:

Buffalo, N.Y. (VOR) Via radial 120	Binghamton, N.Y. (VOR) Via radial 303	3,500
Binghamton, N.Y. (VOR) Via radial 150	East Scranton (INT), Pa.	4,000

23. Blue Civil Airway No. 4, is amended to read:

Burlington, Vt.	Hemingford, P.Q. (FM)	2,000

24. Blue Civil Airway No. 5, is amended to read in part:

Oklahoma City, Okla. (LFR)	Ponca City, Okla. (Rbn) (VOR)	3,100
Ponca City, Okla. (Rbn) (VOR)	Wichita, Kans. (LFR)	2,500
Wichita, Kans. (LFR)	Wichita, Kans. (VOR)	2,800

25. Blue Civil Airway No. 6, is amended to read:

Abilene, Tex. (VOR) Via radial 24 or 39	Wichita Falls, Tex. (VOR) Via radial 191 or 206	*3,000
4,000' - Minimum continuous VOR reception altitude		
Wichita Falls, Tex. (LFR)	Washington, Okla. (FM)	2,500
Washington, Okla. (FM)	Oklahoma City, Okla. (LFR)	2,500
Wichita Falls, Tex. (VOR) Via radial 18 or 33	Oklahoma City, Okla. (VOR) Via radial 182 or 197	*2,400
2,800' - Minimum continuous VOR reception altitude

MILITARY FLIGHT RESTRICTIONS SOUTHWESTERN U. S. (NEVADA, UTAH, COLORADO, ARIZONA, NEW MEXICO).

Effective January 24, 1951, and until further notice, all military flights operating on the portions of the airways described below or within that area bounded by those airways are restricted to airways flying only. All VFR flights on these airways will be required to comply with IFR communications requirements as follows: Pilots will maintain a continuous listening watch on the appropriate CAA frequency and will make position reports in accordance with 'Pilot Procedures with Flight Service and CAA Using both CAA and Flight Service Communications Systems" contained in AN 08-15-1 Radio Facility Charts. All flights shall be prepared for diversion from planned route at any time by CAA Air Traffic Control. Beginning at the intersection of Amber Airway No. 3 and Green 4 (approximately 50 miles east of Albuquerque); thence west on Green 4 to the intersection of Green 4 and Red 15; thence northwest along Red 15 to the intersection of Red 15 and Amber 2; thence southwest on Amber 2 to the intersection of Amber 2 and Red 15; thence northwest along Red 15 to the intersection of Red 15 and Green 3; thence east along Green 3 to the intersection of Green 3 and Amber 3; thence south along Amber 3 to the intersection of Amber 3 and Green 4. All clearing authorities and pilots will give special attention to this restriction and to instructions issued by CAA Air Traffic Control.

EFFECTIVE 0001, 24 JANUARY NELLIS AFB, LAS VEGAS, NEVADA, CLOSED TO ALL TRANSIENT TRAFFIC EXCEPT ON OFFICIAL BUSINESS, OR IN EMERGENCY. USAF AIRCRAFT WILL REQUIRE WRITTEN ORDERS.

RADAR AVAILABLE : How and Where

GCA - GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR. PAR PRECISION APPROACH RADAR. ASR = AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimith information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

(D) = Day. (N) = Night. ➔ = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(G) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
↙ = New facilities or name changes, see page 29
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . .Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . .Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. .Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . . Range (loop radiators), power less than 50 watts
MM. . .VHF middle marker
MOR.. Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL .. Range (loop radiators), power 50 or more, but less than 150 watts
OM. . .VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . . Without voice facilities
Z. . . .VHF station location marker at a range station

RADIOTELEGRAPH CODE

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105. 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blind" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U S Navy Hydrographic Office, Division of Air Navigation, Washington 25, D C.

All Naval Air Stations and Air Facilities are directed to notify the U S Navy Hydrographic Office, Division of Air Navigation, Washington 25, D C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U S Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

Effective January 1, 1951, all Navy range stations, control towers and GCA units in continental United States, discontinued the use of 3117.5 kc.

AIR FORCE SPECIAL NOTICES

✓AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D C., Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields"

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE

W..109.1				"
X...109.5				"
Y...109.9				"
Z ..110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business"

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140 58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11).

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O"); M-59, November 5, 1949 (Service "B").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

IMPLEMENTATION OF 135.90 MC AS CAA AIRWAYS FREQUENCY: Use of 140.58 mc as CAA airways station frequency will be discontinued on April 1, 1951, and use of 135.90 mc will be implemented. In order to improve communications on Channel A, simplex operation on USAF aircraft will be changed to single channel duplex operation at that time for this channel; a receiving crystal on 135 mc and a transmitting crystal on 135.90 mc will be installed in Channel A to replace 140.58 mc. Navy and Coast Guard aircraft will continue to operate on a simplex basis and the frequency of 135.90 mc will replace 140.58 mc in Navy Channels 1 and D and Coast Guard Channel gd-D (or 1 in equipment modified for 18 channels). CAA airways stations will transmit on frequency of 135 mc and receive on 135.90 mc for USAF aircraft; and in the case of Navy and Coast Guard acft will transmit and receive on 135.90 mc.

CHANGES FOR AN 08-15-2: (1) Correct page 1, paragraph 4A, so that it reads as follows: "AIR FORCE: This publication will be corrected in accordance with Technical Order 08-15-10. Any errors noted, or suggested changes, will be reported directly to Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.".

(2) Correct page 48, so that notation at bottom of page reads as follows: "USAF agencies located in the United States will submit request for RAF or RAAF Radio Facility Charts to Headquarters Aeronautical Chart and Information Service, Washington 25, D. C., Attn: Aeronautical Information Division. USAF agencies located outside****".

(3) Correct pages 49 and 50 regarding USAF ICAO Briefing and Clearing Information Bulletins, ICAO Documents, Foreign Clearance Information Guide, and CAA Flight Information Publications so that Headquarters ACIS is given as source for procurement rather than MATS.

CIVIL SPECIAL NOTICES

CIVIL DATA: The airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	119.5 mc	May 10, 1949
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Kansas City Center	120.8 mc	Feb. 8, 1951
New York Center	120.7; 120.3 mc	Jan. 25, Oct. 11, 1951
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.7 mc	Nov. 2, 1950
Washington Center	120.3 mc	Sept. 1. 1949

INSTRUMENT APPROACH PROCEDURES: The ILS Instrument Approach Procedure No. 2 for Seattle-Tacoma Intn'l Arpt, Seattle, Wash. has been CANCELLED, effective January 9, 1951.

NON-STANDARD HOLDING PATTERN: Effective immediately, the following non-standard holding pattern is established: Holding point - ALLENTOWN RANGE; Direction from holding point - NE; Direction of turn - LEFT on the E side of the NE course; Time - 2 minutes.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol 5, No. 1, dated August 1, 1950, as follows:

(1) Page 10. Add Columbus, Georgia CAA Insac telephone number: 3-4363.

(2) Page 20. D/F facility SCITUATE, R. I. was discontinued January 31, 1951. Service formerly provided by Scituate will hereafter be furnished on a continuous basis by MILLIS, Mass. Telephone Number: Millis 291.

CORRECTION TO AIRMAN'S GUIDE: Correct Airman's Guide, Vol 5, No. 23. Page 91, paragraph 12, control zone, Rockford, Ill. Line 3 should read: miles either side of a 182° true bearing from the Rockford rdo rng stn to the Greater.....

✓ MAGNETIC VARIATION CHANGES: The application of 1950 isognic lines to aeronautical charts will cause the magnetic variation at the station of certain radio ranges to be changed, necessitating a change in the magnetic bearings of the courses. The following locations are affected. The new magnetic courses for these ranges will be shown in the listings in the Air Navigation Radio Aids Section.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (1-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (1-30)
BANKS, BCN SITE 35, MEM-TPA: Soon, 24" single end clear 12 rpm bcn with red crs lgts flash. char 5 dot dash dot will be comm. (1-27)
BIRMINGHAM-RADIO: About Feb 20, ILS will be shut down until approx Feb. 27. (2-1)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (12-5) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditiond will letdown S of Mobile to avoid Bates Fld and G-6 Arwys tfc. (1-29)
HUNTSVILLE ARPT: Use N/S Rnwy only. (1-12)
LANETT, BCN SITE 35, MSY-ATL: Soon, site will be perm discontd. (1-27)
★MAXWELL AFB (MONTGOMERY)-RADIO: USAF VHF/DF no longer opers on 137.34 mc. (2-3)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MUSCLE SHOALS-RADIO: Soon, omnirng will be shut down until approx April 8. (1-23)
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (1-3)
NOTASULGA, BCN SITE 32, MSY-ATL: Soon, 24" single and clear 6 rpm bcn with red crs lgts flash. char 2 dot dot dash will be comm. (1-27)
TUSCALOOSA-VAN DE GRAAFF ARPT: NW/SE Strip under const, mrkd. Lnd, take-off N of this area and cross const at mrkd taxiway only. (1-4)
ARIZONA: ARIZONA-SPECIAL NOTICE: Lndg of acft on highways of Colorado River Indian Reservation prohibited by law. (6-22)
**ADAMANA, BCN SITE 52, LAX-AMA: Jan. 31, site perm discontd.
DATELAND AF AUX (AZTEC)-RADIO: USAF X-Band radar bcn inop. (1-19)
ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (6-27)
**LONE MTN, BCN SITE 28, LAX-PHX: Jan 31, site discontd.
**PEACH SPRINGS ARPT: Correct lat 35-32-30, long. 113-25-00. (9-7)
PHOENIX-SKY HARBOR ARPT: Use rnwys only. Ctl twr being erected approx 800' N of intsxn of Rnwy 12-30 and N/S Taxiway. Ctn-equip crossing taxiway. Rnwy 12-30 clsd. (12-1)
**SANTAN, BCN SITE 2, PHX-ELP: Jan 31, site perm discontd.
**TOMBSTONE, BCN SITE 16, PHX-ELP: Jan 31, site perm discontd.
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (2-7)
BENTONVILLE ARPT: Strip under const. Use taxi strip for lndg. (1-4)
BRINKLEY ARPT, SITE 37, DAL-LOU: Clsd ngts. Water in center of strip intsxn. Rows of dirt on SW end NE/SW Strip. (1-4)
CLARKSVILLE ARPT: E/W Strip clsd. (2-12) Data rcvd too late for inclusion of + in Directory of Arpts.
LITTLE ROCK-ADAMS ARPT-TOWER: Transmitting and rcvr poor on all VHF freq S to W account obsts near temp twr until approx Mar. 1, 1952. (12-13) Apch ctl on 353 kc shut down until approx Feb. 27. (11-27) FLD: Use ctn lndg NE or N, vision of ctl twr partially obstructed. (12-21) Lmtd NG svcg avail. (10-24)
WALNUT RIDGE-RADIO: Omnirng gnd checked only. (1-29)
CALIFORNIA: ARCATA ARPT: Ctn - const days. Use rnwys only. (2-7)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable - use for homing only. X-band radar bcn (AN/CPN-6) unreliable. (1-9)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (11-9)
**CLIPPER GAP, BCN SITE 11A, SFO-SLC: Feb. 9, site perm discontd.
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
**CRONESE LAKE, BCN SITE 16, LAX-SLC: Site perm discontd. (2-2)
CULVER CITY-HUGHES ARPT: 6500' of strip under const, mrkd. Area avail to acft under 30,000 lbs. gross. (1-4)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on writter permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-3)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (1-1)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAMILTON AFB-RADIO: Temp compass locater operg on 219 kc has been installed at lat 38-02-56, long. 122-29-44. Oper with voice and ctld by twr. Bear., dist to Rnwy 30: 300°, 1300'. Oper cont. (12-16)
HAMILTON AFB (SAN RAFAEL): Ctn - const on Rnwy 12-30. (9-21)
HAYWARD ARPT: Rnwy 10R028L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (1-3)
LONG BEACH-EAST LONG BEACH ARPT: Strip 21 under const. Use oiled area for lndg and take-offs. (1-29)
LOS ANGELES INTNL ARPT-TOWER: Temp ILS lclar, channel "Y", 109.9 mc comm, serving Rnwy 25L. Ident: LAX. Course aligned on centerline at apch end Rnwy 25L. About Feb. 28, twr voice fac on 278 kc will be combined with and lctd at CAA ILS LMM fac. Present LMM freq 219 kc will be discontd. LMM ident "AX" will be removed during voice transmission. (1-30) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. 100' crane and equip on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily except Sat and Sun. (1-30)
**MANIX, BCN SITE 14, LAX-SLC: Site perm discontd. (2-2)
★MARCH AFB (RIVERSIDE)-RADIO: USAF VHF/DF oper: 0800-0200 daily. (1-2)

[redacted]: MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (10-3)
MONTEREY-PENINSULA ARPT: Equip end Rnwy 28. Observe twr for lgts in addition to rdo clearance. (2-1)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. New hi-intensity apch lgt lane Rnwy 9L-27R operg on test basis. (1-5)
**REDDING, BCN SITE 20, SFO-SEA: Jan 31, site perm discontd.
SAN DIEGO-RADIO: About Feb 21, Omnirng will be shut down until approx April 7. (2-7) Lemon Grove FM figt-checked - oper normal. (2-5)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. No opers Sat, Sun, or holidays. (1-4)
**SAN DIEGO NAS: Rot. ers lgt converted to standard mil. rot. lgt. (2-1) Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (9-28)
SAN FRANCISCO-RADIO: Omnirng on 117.6 mc may be unreliable due to const of pipeline in vcnty of transmitter. Limited communication possible on 122.1 mc because of blocking interference from another freq. (1-26)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO ARPT-TOWER: CAA ILS Lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip on fld. (1-26)
**SAN JOSE, BCN SITE 32, LAX-SFO: Jan 31, site perm discontd.
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end of Rnwy 25 perm clsd to acft with 20,000 lbs. or more gross wt. (5-30)
SANTA MONICA ARPT: Ctn - one medium intensity rnwy lgt 17" above gnd on S side Rnwy 21, 800' from E end, operg on test basis. (12-4)
**TROY, BCN SITE 14, LAX-AMA: Site perm discontd. (2-2)
UKIAH-RADIO: Omnirng on 112.3 mc shut down. (1-12)
[redacted]: SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U. S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)
GREELEY ARPT: Hazardous - drifting snow. Lnd at own risk. (2-12)
**LIMON ARPT: New Fld. Lat 39-16-00, long, 103-39-30. (1-4)
LOWRY AFB (DENVER)-RADIO: USAF VHF/DF figt-checked unsatisfactory - avail for practice steers only. (1-14)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of Feb.
THURMAN-RADIO: Omnirng will be shut down for a 15 min period each day until approx Feb 15. (1-25)
CONNECTICUT: BRIDGEPORT-RADIO: About March 2, SE crs LF rng will be realigned from 324° to 315°. (2-12)
E. HARTFORD-RENTSCHLER ARPT: VFR figt test opers days all alts in 75 mi radius. (1-4)
**SOUTH GLASTONBURY-DUFFORD'S SEAPLANE BASE: (Formerly carried under Glastonbury, Conn.). Lctd: 1.4 mi SW on Connecticut River. Correct lat 41-39-15, long. 72-37-30. Minor acft and engine rprs avail irregularly. (70-(S3)). Fuel: (F1). Ramps, beach. Tanks adj W. (4-25)
DELAWARE: DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (12-12)
DOVER AFB: No svcg trans acft. (9-14)
WILMINGTON-NEW CASTLE CO. ARPT-TOWER: Soon CAA ILS lclzr freq will be changed from 108.9 mc to 109.1 mc and glide path will be comm on 335.0 mc. (1-25) FLD: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs being erected across Delaware Riv 4 mi ENE. (12-1) Excavation edges N/S Rnwy. Equip on fld days. (1-10)

[redacted]: ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let-down procedures, incig "TIMED APCHS". (11-1)
WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac Riv. Acft remain clear of U. S. Naval Medical Center, Bethesda, Md., lat 39-00-30, long. 77-05-30.
WASHINGTON-RADIO-SPECIAL NOTICE: Lost acft emerg procedures have been estab for the Washington Metropolitan Area that provide for maximum utilization of certain surveillance radar units and direction finding homer stns, on 24-hr basis. The Washington Air Route Traffic Control Center (ARTC) has been designated as the control agency whenever such procedures are in operation. These procedures are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress.

BELLINGHAM-RADIO: Omnirng radial 294° which lies over Vancouver, B. C., has a usable dist of 20 mi account crs roughness at the lowest instr alt of 1500' MSL. Radial 40°, usable dist. 35 mi; 225° usable dist 40 mi. Omnirng 115.7 mc inop until approx March 13. (2-13) Data rcvd too late for + on ANRA page.
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate must register at CAA Commun Bldg. (6-8)
ELLENSBURG-RADIO: Omnirng radials 42°, 157°, usable 30 mi; 52° usable 45 mi.
EVERETT-PAINE FLD: Trenches adj taxiway and E/W Rnwy, mrkd. Use rnwys, taxiways. (2-5)
**EVERETT-SNOHOMISH RIVER BOOM SEAPLANE BASE: 80' unmrkd rdo antenna spans Snohomish River 1.5 mi SSW of base. Antenna stretches from sawmill stack on W bank to pole on E bank. (2-12)
FAIRCHILD AFB (SPOKANE): Lmtd maint 0800-1700. (11-17)
FORKS ARPT: Ctn - const. Use taxi strip on S side of lndg strip only. (1-31)
**HARRINGTON ARPT: Correct lat 47-30-00, long. 118-16-00. (1-31)
KELSO-LONGVIEW ARPT: Taxiways clsd. N and E bndry lgts inop. (11-28)
LARSON AFB (MOSES LAKE)-TOWER: USAF GCA flgt-checked unsatisfactory. (1-31)
McCHORD AFB (TACOMA)-RADIO: About Feb 15, the following USAF elliptical-shaped FMs will be comm: Harts Lake FM on S course (10 mi) at lat 46-54-06, long. 122-28-28. Ident: three dashes. McChord FM on N course (8.5 mi) at lat 47-09-31, long. 122-28-31. Ident: one dash. Concurrently CAA Lakeview FM on S course Seattle rng will be perm discont. (2-7)
McCHORD AFB (TACOMA): Trans billeting avail emerg only. (7-27)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., Whidbey Island NAS. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-15)
PROSSER-BEARDSLEY ARPT: Clsd ngts. Ctn - const. Arpt will be clsd to all acft intermittently. Mrkrs will be displayed. (11-16)
SEATTLE-RADIO: About Feb 15, Lakeview FM on S course will be discontd. (2-7)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (1-31)
SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (6-23)
SEATTLE-TACOMA INTNL ARPT: Equip on fld. (1-31)
SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi, SW and N 30 mi each. (1-5)
SPOKANE-RADIO: Omnirng crs have wide crs roughness with signal fades or surges. (1-30)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq 201 kc. (12-21) FLD: Taxiway between Rnwy 2 and 34 clsd. Equip on fld. (12-13)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs per wheel if tire pressure is under 85 lbs; or 35,000 lbs if tire pressure is over 85 lbs. (10-31)

WASHINGTON: YAKIMA-RADIO: Omnirng radials 176°, usable 35 mi; 336°, 123° 40 mi; 321° 38 mi. About Feb 23, omnirng will be shut down until approx Mar 30 - modernization. (2-8)

WEST VIRGINIA: CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not ctld by twr. Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. Hazard bcns lctd each end Rnwy 14-32 oper on test basis. (1-25)
ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)
MORGANTOWN-RADIO: LF rng gnd-checked only. (11-21)
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough.
WHEELING-RADIO: Soon CAA ILS LMM, LOM will be comm. LMM freq: 230 kc, ident: LG. LOM freq. 275 kc, ident: HL. Modulation and keying interrupted for stn voice transmission. Concurrently with the comm of LOM, low freq stn transmitter on 326 kc will be decomm. (2-8)
WHEELING-OHIO CO. ARPT: Turf area clsd. Equip on fld days. Use rnwys, taxiways only. (1-26)
Wisconsin: DRUMMOND-SORENSEN ARPT: Clsd (snow). N/S Strip under const. Const S side E/W Strip. (2-7)
**FOND DU LAC ARPT: Correct lat 43-47-15, long. 88-25-00. (1-30)
**GLIDDEN ARPT: Correct lat 46-07-45, long. 90-34-30. (9-7)
GREEN BAY-AUSTIN-STRAUBEL ARPT: Snow on all rnwys. Braking action poor. (1-8)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
MADISON ARPT: Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (1-21)
MARSHFIELD ARPT: E/W Rnwy plowed 100 x 2300'. Snow bank N edge. Rest of fld open to ski-equipped acft only. (1-12)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (11-28)
**MILWAUKEE SEAPLANE BASE: (revised data). Lctn: 3 mi ESE on Lake Michigan. Lat 43-02-00, long. 87-54-00. Elev: 580'. No major or minor acft or engine rprs. Ramp, piers. Comb. oper with arpt. (11-22)
OCONTO ARPT: E/W and NE/SW Strips open to wheeled acft only. (1-15)
PHILLIPS ARPT: Open to ski-equipped acft only. (1-31)
SHAWANO ARPT: NE/SW Strip open to wheeled acft only. (1-15)
STEVENS POINT ARPT: Strips, taxiways plowed. Strips also suitable for skis. (1-10)
**WAUSAU-ALEXANDER SEAPLANE BASE: Fuel: F2. (11-22)
WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt beyond 35 mi.
CHEROKEE-RADIO: About Feb. 26 until approx Mar 2, INSAC will be shut down for relctn from Sinclair to Rawlins, Wyo. During this period, omnirng will oper unmonitored and without voice. (1-21)
FT. BRIDGER INT FLD: Ctn - snow, ice. Use harrowed strip only. Strip approx 275 x 4500' running E/W parallel NE bndry. 12" snow drifts on rest of fld. (1-25)
KEMMERER ARPT: Open to ski-equipped acft only. (1-29)
MOORCROFT-RADIO: Omnirng radials between 100° and 120° unusable beyond 30 mi at 9000' MSL. (8-8)
SINCLAIR-RADIO: About Feb 26 until approx Mar 2, INSAC will be shut down for relctn to Rawlins, Wyo. During this period LF rng operg unmonitored and without voice. (1-21)

MINIMUM EN ROUTE INSTRUMENT ALTITUDES: Effective February 23, 1951, minimum en route instrument altitudes are amended as follows:

	From	To	Min Alt
Green Airway No. 4 is amended to read in part:	Anton Chico, N. M. (VOR) via LFR or VOR radial 74	Cuervo (Int), N. M.	7500
	Cuervo (Int), N. M.	Tucumcari, N. M. (LFR) (VOR) via LFR or VOR radial 254	7000
Green Arwy No. 5 is amended to read in part:	Anton Chico, N. Mex. VOR via radial 59	Tucumcari, N. Mex. (VOR) via radial 269	7500
	Midland (Int), Tex. or VOR via LFR or VOR radial 55	Big Spring, Tex. (LFR) (VOR) via LFR or VOR radial 236	4000
	Midland, Tex. (VOR) via radial 40	Big Spring, Tex. (VOR) via radial 251	4300
	Big Spring, Tex. (LFR) (VOR) via LFR or VOR radial 70	Abilene, Tex. (LFR) (VOR) via LFR or VOR radial 251	4000
	Big Spring, Tex. (VOR) via radial 85	Abilene, Tex. (VOR) via radial 236	4000
Amber Arwy No. 4 is amended to read in part:	Newalla (Int), Okla.	Tulsa, Okla. (LFR)	2200
Amber Arwy No. 5 is amended to read in part:	Memphis, Tenn. (LFR) (VOR) via LFR or VOR radials 166 or 181	Greenwood, Miss. (LFR) (VOR) via LFR OR VOR radials 001 or 16	*1300
	1600' - Minimum continuous VOR reception altitude		
	Greenwood, Miss. (LFR) (VOR) via LFR or VOR radials 180 or 195	Jackson, Miss. (LFR) (VOR) via LFR or VOR radials 359 or 344	1700
	Jackson, Miss. (LFR) (VOR) via LFR or VOR radials 175 or 190	McComb, Miss. (LFR) (VOR) via LFR or VOR radials 339 or 354	1600
	McComb, Miss. (LFR) (VOR) via LFR or VOR radials 175 or 190	New Orleans, La. (LFR) (VOR) via LFR or VOR radials 340 or 355	1600
Red Arwy No. 10 is amended to read in part:	Clarendon, Tex. (LFR)	Wichita Falls, Tex. (LFR)	3900
Red Arwy No. 11 is amended. to read in part:	Evansville, Ind. (LFR)	Lanesville (Int), Ind.	2000
	Lanesville (Int), Ind.	Louisville, Ky. (LFR)	2100
Red Arwy No. 23 is amended to read in part:	Buffalo, N. Y. (VOR) via radial 137	Elmira, N. Y. (VOR) via radial 308	*3500
	4500' Minimum continuous VOR reception altitude		
	Elmira, N. Y. (VOR) via radial 138	Cladwell, N. J. (VOR) via radial 305	*3500
	6000' - Minimum continuous VOR reception altitude		
Red Arwy No. 62 is amended to read in part:	Detroit, Mich. (LFR)	South Bass (Int), Ohio	2300
	South Bass (Int), Ohio	Sandusky (Int), Ohio	1900
	Sandusky (Int), Ohio	Wellington, Ohio (VAR)	2300
Red Arwy No. 91 is amended to read in part:	Carlsbad, N. Mex. (LFR) (VOR) via LFR or VOR radials 50 or 65	Hobbs, N. Mex. (LFR) (VOR) via LFR or VOR radials 230 or 215	5000
Red Arwy No. 96 is amended to read in part:	Big Spring, Tex. (VOR) via radial 43	Int. N crs Abilene, Tex. (LFR) & Wichita Falls, Tex. (VOR) radial 226	*3000
	7000' Minimum continuous VOR reception altitude		
	Int. N crs Abilene, Tex. (LFR) & Wichita Falls, Tex. (VOR) radial 226	Wichita Falls, Tex. (VOR) via radial 226	*3000
	7000' Minimum continuous VOR reception altitude		
Red Arwy No. 97 is amended to read in part:	Buffalo, N. Y. (VOR) Via radial 120	Binghamton, N. Y. (VOR) via radial 303	*3500
	4500' minimum continuous VOR reception altitude		

	From	To	Min Alt
	Binghamton, N. Y. (VOR) via radial 150 4500' minimum continuous	East Scranton (Int), Pa. VOR reception altitude	*4000
Blue Arway No. 5 is amended to read in part:	Oklahoma City, Okla. via LFR	Oxford (Int), Kans.	3000
	Oxford (Int), Kans.	Wichita, Kans. (LFR) via LFR	2500
	Oklahoma City, Okla. (LFR) (VOR) via LFR or VOR radial 008	Ponca City, Okla. (RBN) (VOR) via RBN or VOR radial 188	3100

	Int. S crs Selfridge, Mich. (LFR) & E crs Toledo, Ohio (LFR)	South Bass (Int), Ohio	1900
Blue Arwy No. 22 is amended to read in part:	Tulsa, Okla. (VOR) Via radial 271 or 286	Ponca City, Okla. (VOR) (RBN) via radial 105 or 120 or RBN	2400
Direct Routes - Southeast U.S. is amended to read in part:	Albany, Ga. (LFR)	Valdosta, Ga. (RBN)	1600
	Jackson, Miss. (LFR)	Baton, Route, La. (LFR)	1600
Direct Route - Southeast U. S. is amended to read in part:	Shreveport, La. (LFR)	El Dorado, Ark. (VOR)	1600

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective 0001 EST, March 6, 1951, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows unless otherwise advised:

Civil Airways: Amber civil airway No. 7 (Key West, Fla. to Caribou, Me.) is amended by deleting the portion which reads: excluding that portion more than 3 miles E of the SW crs of the Washington, D. C. rdo rng between the Doncaster, Md. fan marker and the intsxn of the SW crs of the Washington, D. C. rdo rng and the NW crs of the Tappahannock, Va. rdo rng

(2) Red civil airway No. 14 (Lone Rock, Wis. to Huntington, W. Va.) is amended by adding the following to the end of the present airway: From the Louisville, Ky. omnirng stn via the intsxn of the Louisville, Ky. omnirng 135° mag radial and the W crs of the Lexington, Ky. VHF rdo rng; Lexington, Ky. VHF rdo rng stn to the Huntington, W. Va. rdo rng stn.

(3) Red civil airway No. 19 (Goshen, Ind. to Norfolk, Va.) is amended by deleting the first sentence which reads: "From the Grand Rapids, Mich. rdo rng stn via the intsxn of the SW crs of the Grand Rapids, Mich. rdo rng and the N crs of the Goshen, Ind. rdo rng to the Goshen, Ind. rdo rng stn."

(4) Blue civil airway No. 3 (Tallahassee, Fla. to Sault Ste Marie, Mich.) Add to end of present airway: "From the intsxn of the S crs of the Goshen, Ind. rdo rng and the SW crs of the Fort Wayne, Ind. rdo rng via the Goshen, Ind. rdo rng stn; the intsxn of the N crs of the Goshen, Ind. rdo rng and the SW crs of the Grand Rapids, Mich. rdo rng; Grand Rapids, Mich. rdo rng stn; Cadillac, Mich. non-directional rdo bcn; Traverse City, Mich. rdo rng stn; Pellston, Mich. non-directional rdo bcn to the Sault Ste Marie, Mich. rdo rng stn."

(5) Blue civil airway No. 42 (Goshen, Ind. to Saginaw, Mich.) Delete the first sentence which reads: "From the intsxn of the S crs of the Goshen, Ind. rdo rng and the SW crs of the Fort Wayne, Ind. rdo rng to the Goshen, Ind. rdo rng stn."

(6) Blue civil airway No. 62 (Ypsilanti, Mich. to Traverse City, Mich.) Add to present airway: "the Gladwin, Mich. non-directional rdo bcn to the Traverse City, Mich. rdo rng stn'

(7) Blue civil airway No. 81 (Charleston, W. Va. to Akron, Ohio). is added to read: From the intsxn of the N crs of the Charleston, W. Va. rdo rng and the SW crs of the Parkersburg, W. Va. VHF rdo rng via the Zanesville, Ohio non-directional rdo bcn to the Akron, Ohio rdo rng stn.

Control Areas: (1) Green civil airway No. 3 control area (San Francisco, Calif. to Boston, Mass.) is amended by adding the following to the present control areas: "From the Chicago Heights, Ill. omnirng stn to the intsxn of the Chicago Heights omnirng 331° mag. enroute radial and the Chicago-Midway ILS lclzr crs; from the Chicago Heights, Ill. omnirng stn to the Millersburg, Ind. omnirng stn via the direct enroute and 15° S altitude change radial Millersburg, Ind. omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute and 15° N and S altitude change radials; Toledo, Ohio omnirng stn to the Cleveland, Ohio omnirng stn via the direct enroute and the Toledo omnirng 121° mag. and the Cleveland omnirng 262° mag. altitude change radials; Cleveland, Ohio omnirng stn to the Youngstown, Ohio omnirng stn via the direct enroute and 15° N altitude change radials and the Cleveland omnirng 120° mag. and the Youngstown 255° mag. altitude change radials; Toledo, Ohio omnirng stn to the Youngstown, Ohio omnirng stn via the intsxn of the Toledo 121° mag alt change radial and the W crs of the Wellington, Ohio VAR VHF rdo rng; Wellington, Ohio VAR VHF rdo rng stn; the intsxn of the E crs of the Wellington, Ohio VAR VHF rdo rng and the Youngstown 255° mag alt change radial; from the Youngstown, Ohio omnirng stn to the Philipsburg, Pa. omnirng stn via the direct enroute and the Youngstown 92° mag. and the Philipsburg 310° mag. alt change radials; Philipsburg, Pa. omnirng stn to the Selinsgrove, Pa. omnirng stn via the direct enroute radials; Selinsgrove, Pa. omnirng stn to the Allentown, Pa. omnirng stn via the direct enroute radials; Allentown, Pa. omnirng stn to the Matawan, N. J. VAR VHF rdo rng stn via the Allentown omnirng direct enroute radial; from the Allentown, Pa. omnirng stn to the Linden, N. J. non-directional rdo bcn via the Allentown omnirng direct enroute radial; from the Allentown, Pa. omnirng stn to the Caldwell, N. J. omnirng stn via the direct enroute radials; and from the Philipsburg, Pa. omnirng stn to the Caldwell, N. J. omnirng stn via the Philipsburg 90° mag. and the Caldwell 288° mag. altitude change radials; from the Selinsgrove, Pa. omnirng stn to the Caldwell, N. J. omnirng stn via the Selinsgrove 86° mag. and the Caldwell 288° mag. alt change radials, and from the Philipsburg, Pa. omnirng stn to the Allentown 268° mag. alt change radials, excluding that portion which lies more than 4 miles S of the Allentown, Pa. omnirng 268° alt change radial."

(2) Amber civil airway No. 6 control area is amended to read: (Jacksonville, Fla. to United States-Canadian Border). All of Amber civil airway No. 6 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Nashville, Tenn. omnirng stn to the Bowling Green, Ky. omnirng stn via the direct enroute and 15° E alt change radials including all that area bounded on the SW by Blue 3, on the NW by Amber 6 and on the E by the Nashville-Bowling Green omnirng direct enroute radials.

(3) Red civil airway No. 12 control area (Kansas City, Mo. to Williamsport, Pa.) is amended by adding the following to the present control area: From Naperville, Ill. omnirng stn to the South Bend, Ind. omnirng stn via the direct enroute radials. From the Erie, Pa. omnirng stn to the Philipsubrg, Pa. omnirng stn via the direct enroute radials.

(4) Red civil airway No. 14 control area is amended by changing the caption to read: (Lone Rock, Wis. to Huntington, W. Va.)

(5) Red civil airway No. 19 control area is amended by changing the caption to read: (Goshen, Ind. to Norfolk, Va.).

(6) Red civil airway No. 55 control area is amended to read: (Burlington, Iowa to Columbus Ohio). All of Red civil airway No. 55 including all that area 5 miles either side of the direct enroute radials from the South Bend, Ind. omnirng stn to the Millersburg, Ind. omnirng stn.

(7) Blue civil airway No. 3 control area (Tallahassee, Fla. to Sault Ste Marie, Mich.) is amended to read: All of Blue civil airway No. 3 from the Tallahassee, Fla. rdo rng stn to a point 25 miles N of the Pellston, Mich. non-directional rdo bcn, including all that area within 5 miles either side of the direct enroute radials from the Nashville, Tenn. omnirng stn to the Evansville, Ind. omnirng stn and including the area bounded on the NW by Blue 44 on the E by Blue 3 and on the SW by the Nashville-Evansville omnirng direct enroute radials.

(8) Blue civil airway No. 42 control area is amended by changing the caption to read: (Goshen, Ind. to Saginaw, Mich.) .

(9) Blue civil airway No. 62 control area is amended by changing the caption to read: (Ypsilanti, Mich. to Traverse City, Mich.).

(10) Blue civil airway No. 81 control area (Charleston, W. Va. to Akron, Ohio) is added to read: All of Blue civil airway No. 81.

Control Area Extensions: (1) Control area extension Lebo, Kans. is revoked.

(2) Control area extension (Victorville, Calif.) All that area within the vicinity of George AFB, Victorville, Calif. bounded on the N by Green 4, on the SW by Blue 14 and on the SE by Amber 2.

(3) Control area extension (Ada, Okla.) All that area within a 15 mile radius of the Ada, Okla. Mun. Arpt.

(2-13-51)

(4) Control area extension Des Moines, Iowa, is revoked.

(5) Control area extension (Youngstown, Ohio) is added to read: All that area within a 15 mile radius of the Youngstown, Ohio omnirng stn.

(6) Control area extension (Danville, Va.) is amended to read: Within a 5 mile radius of the Danville Mun Arpt extending 5 miles either side of a track bearing 356° True from the arpt to a point 10 miles N, and extending 5 miles either side of a track bearing 57° True from the arpt to a point 10 miles NE of the arpt.

(7) Control area extension (Allentown, Pa.) All that area within a 15 mile radius of the Allentown, Pa. omnirng stn.

(8) Control area extension (Philipsburg, Pa.) All that area within a 15 mile radius of the Philipsburg, Pa. omnirng stn.

(9) Control area extension (Tampa, Fla.) is added to read: From the Tampa, Fla. rdo rng stn to the eastern boundary of the New Orleans Oceanic Control Area along a rhumb line between the Tampa, Fla. rdo rng stn and the Callendar, La. non-directional rdo bcn, extending 5 miles either side of the rhumb line at the Tampa rdo rng stn thence diverging to a width of 10 miles either side of the rhumb line at its intersection with the eastern boundary of the New Orleans Oceanic Control Area, excluding that portion below 2000' which lies outside the continental limits of the United States.

(10) Control area extension (Tampa, Fla.) is added to read: From the Tampa, Fla. rdo rng stn to the intsxn of the SW crs of the Tampa rdo rng with the eastern boundary of the Miami Oceanic Control Area, extending 5 miles either side of the SW course at the rdo rng stn thence diverging to a width of 10 miles of the SW crs at its intsxn with the eastern boundary of the Miami Oceanic Control Area, excluding that portion below 2000' which lies outside the continental limits of the United States.

(11) Control area extension (Tampa, Fla.) is added to read: All that area 5 miles either side of a straight line from the Tampa, Fla. rdo rng stn to the Key West, Fla. rdo rng stn, excluding that portion below 2000' between its intsxn with the SW crs of the Fort Myers, Fla. rdo rng and Amber civil airway No. 7 and excluding the portion which overlaps Warning Areas

(12) Control area extension (Miami, Fla.) is added to read: From the intsxn of the SE crs of the Fort Myers, Fla. rdo rng and the W crs of the Miami, Fla. rdo rng to the eastern boundary of the Miami Oceanic Control Area, along a rhumb line between that intsxn and the Brownsville, Texas rdo rng stn, extending 5 miles either side of the rhumb line between that intsxn and a point on the coastline at lat. 25°45'50", long. 81°30'40", thence extending 5 miles on the S side and diverging on the N side of the rhumb line to a width of 10 miles at its intsxn with the eastern boundary of the Miami Oceanic Control Area, excluding the portion below 2000' which lies outside the continental limits of the United States.

(13) Control area extension (Miami, Fla.) is added to read: From the Miami, Fla. rdo rng stn extending 5 miles either side of a straight line to the Key West, Fla. rdo rng stn, excluding the portion below 700' and excluding the portion which overlaps Airspace Warning Area.

(14) Control area extension (Key West, Fla.) is added to read: From the Key West, Fla. rdo rng stn to the northern boundary of the Havana, Cuba, control area, extending 5 miles either side of a rhumb line between the Key West, Fla. rdo rng stn and the Rancho Boyeros, Havana, Cuba non-directional rdo bcn, excluding the portion below 2000' which lies outside the continental limits of the United States.

(15) Control area extension (Key West, Fla.) is added to read: From the intsxn of the SW crs of the Homestead, Fla. rdo rng and the NE crs of the Key West, Fla. rdo rng to the northern boundary of the Havana, Cuba control area, extending 5 miles either side of a rhumb line between that intsxn and the Rancho Boyeros, Havana, Cuba non-directional rdo bcn, excluding the portion below 2000' between Amber Civil Airway No. 7 and the Havana, Cuba Control Area Boundary.

(16) Control area extension (West Palm Beach, Fla.) is added to read: From the West Palm Beach, Fla. rdo rng stn extending 5 miles either side of the E crs of the West Palm Beach, Fla. rdo rng to its intsxn with the western boundary of the Miami Oceanic/Nassau Control Area, excluding the portion below 2000' outside the continental limits of the United States and excluding the portion which overlaps Airspace Warning Areas.

(17) Control area extension (West Palm Beach, Fla.) is added to read: From the West Palm Beach, Fla. rdo rng stn to the western boundary of the Miami Oceanic/Nassau Control Area, extending 5 miles either side of a rhumb line between the West Palm Beach, Fla. rdo rng stn and the Nassau, B. W. I. rdo rng stn, excluding the portion below 2000' which lies outside the continental limits of the United States.

(18) Control area extension (Miami, Fla.) is added to read: An area bounded by a line beginning on the eastern edge of Amber civil airway No. 7 at lat. 25-53-00, thence easterly to the western boundary of the Miami Oceanic/Nassau Control Area at lat. 35-55-00, long. 79-00-00, thence due south along that boundary to lat. 24-40-00; thence southwesterly to lat. 24-00-00, long. 80-25-00; thence due N to the eastern edge of Amber No. 7, thence along Amber 7 to lat. 25-53-00, point of beginning, excluding that portion below 1000' which lies outside the continental limits of the United States.

Control Zones: (1) 3 mile control zone is amended by deleting the following arpt: Oceana, Va., Naval Auxiliary Air Station.

(2) 5 mile control zone is amended by adding the following arpt: Oceana, Va., Naval Auxiliary Air Station.

(3) Houston Texas control zone is amended to read: Within a 5 mile radius of the Houston Mun Arpt and within a 5 mile radius of the Ellington AFB, extending 2 miles either side of the SE crs of the Houston rdo rng to the Webster FM, extending 2 miles either side of the SW crs of the Houston rdo rng to the Arcola FM, and extending 2 miles either side of the NW crs of the Houston rdo rng to the Houston FM.

(4) Lebo, Kansas control zone is revoked.

(5) Pellston, Mich. control is added to read: Within a 5 mile radius of Emmet County Arpt, Pellston, Mich. extending 2 miles either side of a track bearing 132° true from the Pellston non-directional rdo bcn to a point 10 miles SE.

(6) New York, N. Y. control zone is amended to read: Within a 5 mile radius of the New York International Arpt (Idlewild), extending 2 miles either side of the SW crs of the Idlewild, N. Y. rdo rng to the intsxn of the SW crs of the Idlewild rdo rng and the NE crs of the Philadelphia, Pa. rdo rng and extending 2 miles either side of the SE crs of the Floyd Bennett (Navy) rdo rng to the intsxn of the SE crs of the Floyd Bennett (Navy) rdo rng and the SW crs of the Mitchel AFB rdo rng.

(7) Traverse City, Mich. control zone is added to read: Within a 5 mile radius of Traverse City Arpt extending 2 miles either side of the SE crs of the Traverse City rdo rng to a point 10 miles SE of the rdo rng stn.

(8) Victorville, Calif. control zone is added to read: Within a 5 mile radius of George AFB Victorville, Calif., extending 2 miles either side of a track bearing 360° true from the George AFB to a point 15 miles N.

Reporting Points: (1) Amber civil airway No. 7 (Key West, Fla. to Caribou, Maine) is amended after Key West, Fla. rdo rng stn by adding the following compulsory reporting point: the intsxn of the NE crs of the Key West, Fla. rdo rng and the SW crs of the Homestead, Fla. rdo rng.

(2) Red civil airway No. 14 (Lone Rock, Wis. to Huntington, W. Va.) Caption Change.

(3) Red civil airway No. 19 (Goshen, Ind. to Norfolk, Va.) Caption Change.

(4) Blue civil airway No. 3 (Tallahassee, Fla. to Sault Ste Marie, Mich.) Caption Change.

(5) Blue civil airway No. 39 (Knoxville, Tenn. to U. S. Canadian Border) is amended by adding the following compulsory reporting point BEFORE "Syracuse, N. Y. rdo rng stn". The intsxn of the SE crs of the Pittsburgh, Pa. rdo rng and the NE crs of the Morgantown, W. Va. rdo rng.

(6) Blue civil airway No. 42 (Goshen, Ind. to Saginaw, Mich.) Caption Change.

(7) Blue civil airway No. 62 (Ypsilanti, Mich. to Traverse City, Mich.) Caption Change.

(8) Blue civil airway No. 81 (Charleston, W. Va. to Akron, Ohio) is added to read: No reporting point designation.

(9) Other reporting points are amended by adding the following compulsory reporting points:

Gulfstream intsxn: The intsxn of the SE crs of the Miami, Fla. rdo rng and the NE crs of the Key West, Fla. rdo rng.

Abilene, Texas omnirng stn; Albuquerque, N. Mex. omnirng stn; Ardmore, Okla. omnirng stn; Big Spring, Texas omnirng stn; Carlsbad, N. Mex. omnirng stn.

Delaware Springs intsxn: The intsxn of the Salt Falt, Texas 73° mag radial and the Carlsbad, N. Mex. 203° mag radial.

El Paso, Texas omnirng stn; Ft. Worth, Texas omnirng stn.

Harrington intsxn: The intsxn of the Hot Springs, N. Mex. 149° mag radial and the El Paso, Texas 258° mag radial.

Hobbs, N. Mex. omnirng stn; Hot Springs, N. Mex. omnirng stn.

La La Joya intsxn: The intsxn of the Hot Springs, N. Mex. 8° mag. radial and the Albuquerque N. Mex. 155° mag. radial.

Las Vegas, N. Mex. omnirng stn; Midland, Texas omnirng stn; Mineral Wells, Texas omnirng stn; Oklahoma City, Okla. omnirng stn; Otto, N. Mex. omnirng stn; Ponca City, Okla. omnirng stn; Raton, N. Mex. omnirng stn; Roswell, N. Mex. omnirng.

Rule intsxn: The intsxn of the Big Spring, Texas 43° mag radial and the Abilene, Texas 348° mag. radial.

Salt Flat, Texas omnirng stn; San Angelo, Texas omnirng stn; Santa Fe, N. Mex. omnirng stn; Tucumcari, N. Mex. omnirng stn; Tulsa, Okla. omnirng stn; Wichita Falls, Texas omnirng

(2-13-51)

REGULATIONS OF THE ADMINISTRATOR
PART 620 - EFFECTIVE DEC. 27,1950
SECURITY CONTROL OF AIR TRAFFIC

The regulation reads in part as follows.....

SUBPART B - OPERATING RULES

620.10 Scope. Aircraft shall not be operated into or within an Air Defense Identification Zone (ADIZ) prescribed by the Administrator in Subpart C of these regulations, in violation of the following rules:

620.11 Flight Plans. Unless otherwise authorized under section 620.13, prior to penetrating and ADIZ or prior to take-off from a point within an ADIZ, a flight plan shall be filed with an appropriate aeronautical facility. Such flight plan shall contain:

(a) For IFR flights, the information specified in section 60.41 of the Air Traffic Rules of Part 60 of the Civil Air Regulations. (14 C.F.R, Part 60).

(b) For VFR flights, unless an abbreviated flight plan is authorized the information specified in paragraphs (a) through (g) inclusive and (i) and (j) of Section 60.41 of the Air Traffic Rules. (14 C.F.R., Part 60). Such a flight plan shall be designated by the pilot in command as a Defense Visual Flight Rule (DVFR) flight plan.

620.12 Reporting Points

(a) Flight within or penetrating a Domestic ADIZ or entering the United States across an International Boundary ADIZ - Unless otherwise authorized under section 620.13:

(1) IFR Flights - Position reports shall be made as required by Section 60.47 of the Civil Air Regulations. (14 C.F.R., Part 60).

* (2) DVFR Flights - The pilot in command of an aircraft shall not enter or operate within an ADIZ unless the aircraft is equipped with a functioning two-way radio and shall not enter an ADIZ until he has reported to an appropriate aeronautical facility either (a) the estimated time, position, and altitude at which he will penetrate the ADIZ or (b) the time, position, and altitude at which the aircraft passed the last reporting point along the flight path of the aircraft prior to penetration of an ADIZ and his estimated time over the next reporting point along the intended flight path of the aircraft.

NOTE: Whenever it shall appear that the previously filed estimate is in error, as to time by more than five minutes, or as to position by more than 20 miles, a corrected estimate shall be filed with an appropriate aeronautical facility.

(b) Aircraft entering the United States through a Coastal ADIZ:

(1) United States aircraft - The reports prescribed in paragraph (a) of this section are required.

(2) Foreign aircraft - Prior to entering the United States, Foreign aircraft shall (A) make position reports as prescribed for United States aircraft in paragraph (1) above or (B) in lieu thereof, the pilot in command of a foreign aircraft operating under either Instrument of Visual Flight Rules shall report to an appropriate aeronautical facility when the aircraft is not less than one hour and not more than two hours average cruising distance via the most direct route, from the United States. Thereafter, reports shall be made as instructed by the facility receiving the original report.

NOTE: Operators of foreign aircraft who exercise the optional position reporting method described in subsection (B) above are cautioned that this procedure does not eliminate the position reporting requirements prescribed for the control of air traffic.

620.13 Authorized Exceptions:

* (a) Intra-Zone VFR flights. A CAA airways operation facility exercising security control may, under certain conditions, authorize VFR flights which are (1) local, (2) between points located within the boundaries of an ADIZ, or (3) from points within an ADIZ to points outside thereof, without compliance with the flight plan and reporting requirements of sections 620.11 and 620.12. Such flights shall be operated in accordance with the instructions, if any, issued at the time the authorization is granted.

(b) Altitude Limitations. The provision of sections 620.11 and 620.12 are not applicable to aircraft operating within the Knoxville, Albuquerque, Los Angeles, San Francisco and Northwest Air Defense Identification Zones at altitude less than 4,000 feet above the immediate terrain or to aircraft entering these same Air Defense Identification Zones from within the continental limits of the United States at altitudes less than 4,000 feet above the immediate terrain.

620.14 Air Defense Security Instructions. Under emergency defense conditions which may involve the national security, aircraft shall be operated into or within an ADIZ in accordance with such additional special security instructions issued by the Administrator as may be deemed necessary for the identification, location and control of the particular flight.

NOTE: Such instructions will be designated as "Air Defense Security Instructions." Emergencies involving the national security may require the exercise of special control for identification purposes. In such cases instructions may be issued requiring identification turns, flight in a specified direction or location, or such other instructions as may be necessary.

620.15 Adherence to DVFR Flight Plans and Air Traffic Clearances

(a) IFR Flights -

(1) Within Control Zones and Areas - No deviation shall be made from an IFR flight plan unless an amended clearance is obtained from CAA air traffic control through an appropriate aeronautical facility as provided in the air traffic rules, section 60.21 of the Civil Air Regulations (14 C.F.R. 60, as amended).

(2) Outside Control Zones and Areas - When a flight is conducted in accordance with IFR within or into an ADIZ where an air traffic clearance is not required by the Civil Air Regulations, no deviation from the flight plan, as filed, shall be made unless prior notification is given to an appropriate aeronautical facility.

* (b) DVFR Flights - No deviation shall be made from a DVFR flight plan unless prior notification is given to an appropriate aeronautical facility, except, that a pilot may, when within 20 miles of his destination, commence his descent from cruising altitude without making a report of change in altitude.

620.16 Emergency Situations. In emergency situations which require immediate decision and action for the safety of the flight, the pilot in command of the aircraft may deviate from the provision of this part to the extent required for such emergency. When a deviation is exercised the pilot in command shall report such deviation and the reasons therefor, as soon as practicable to an appropriate aeronautical facility.

620.17 Radio Failure

(a) IFR Flights - In case of the failure of two-way radio communications, the pilot in command of the aircraft shall take the action required by Section 60.49 of the Civil Air Regulations. (14 C.F.R. Part 60 as amended).

(b) DVFR Flights - In case of the failure of two-way radio communications the flight may proceed in accordance with the original DVFR flight plan and the pilot in command of the aircraft shall make a report of such failure, as soon as possible, to an appropriate aeronautical facility.

620.18 Violations. In addition to the penalties otherwise provided for by the Civil Aeronautics Act of 1938, as amended, any person who knowingly or willfully violates any provision of the regulations prescribed in this part, or any order issued thereunder shall be deemed guilty of a misdemeanor and upon conviction thereof, shall be subject to a fine of not exceeding $10,000 or to imprisonment not exceeding one year, or to both such fine and imprisonment.

AIRMAN'S GUIDE

SPECIAL NOTICE

All concerned should refer to message notam displays in addition to weather report displays for flight information since numerous items of notam information will appear only in message notam form and may not receive the same distribution as the weather reports. Only the most significant items of notam information will continue to be transmitted at the end of weather reports.

DIRECTORY OF AIRPORTS Pages 21 through 76

RADIO FACILITY DATA Pages 7 through 20

NOTICES TO AIRMEN Pages 77 through 96

VOL. 5, NO. 25 .. FEBRUARY 27, 1951

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION DEVELOPMENT

The printing of this publication has been approved by the Director of the Bureau of the Budget, March 28, 1950

For sale by Superintendent of Documents, U.S. Government Printing Office Washington 25, D.C. - Price 25 cents per copy, $6.00 per year.

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).
PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply
SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimith information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.
CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc

AIR FORCE GCA UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL AIR FORCE UNITS TRANSMIT ON AND GUARD THE FOLLOWING CHANNELS (FREQUENCIES): B=126.18; C=137.88; D=121.5; G=136.80; H=134.1, 142.02 mc; 3475, 4890 and 6640 kc.

STATION	Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.
Andrews AFB, Md.	529	250	1(D)1½(N)	Cont. Grds 4495
Barksdale AFB, La.	417	250	1(D)1½(N)	Cont IFR: 10-23 daily, 30 min notice other hrs

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency. When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. ➔ = New or revised data. ✓ = New facilities or name changes

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met (A) The visual course alignment and signal level are monitored continuously (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere, (Y) = Yellow hemisphere
→ - New or revised data
↙ - New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour, Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . Teletype
TX. . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR . Visual-aural VHF range
VOR. Omni VHF omni-directional range (omni-range)
W. . . Without voice facilities
Z. . . . VHF station location marker at a range station

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
\# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc, 122.1,126 7.140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58.122.1 = guards every frequency in group (3) except 140 58 and 122 1
(3).6210-140.58 = guards 6210 plus every frequency in group (3) except 140 58

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A MH facilities operate continuously unless cited as follows (on req)
3. All C.A.A ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A airway communications stations and control towers the frequency on which the reply is expected

(2-27-51)

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

- h - runway is paved (concrete, asphalt or similar type of paving)
- aw - allway field
- (26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1. 80 oct., at least
F2. 87 oct., and lower
F3: 91 oct., and lower
F4. 100 oct., and lower

NOTE. If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+	115/145 oct.	C	73/80 oct.
A	100/130 oct.	J	JP - 1
B	91/98 oct.	J3	J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency

V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as requirec by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet Aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949"

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

✓ CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓ IMPLEMENTATION OF 135.90 MC AS CAA AIRWAYS FREQUENCY: Discontinuance of 140.58 mc as CAA airways station frequency and implementation of 135.90 or 135.9/135 originally scheduled for March 1, 1951, has been postponed to 1700Z April 1. In order to improve communications on Channel A, simplex operation on USAF aircraft will be changed to single channel duplex operation for that channel at that time; a receiving crystal on 135 mc and a transmitting crystal on 135.90 mc will be installed in Channel A to replace 140.58 mc. Navy aircraft will continue to operate on a simplex basis and the frequency of 135.90 mc will replace 140.58 mc in Navy Channels 1 and D. Coast Guard aircraft will on April 1 use 135.90 mc simplex in lieu of 140.58 mc but will in the near future convert equipment so as to transmit on 135.90 mc and receive on 135 mc. CAA airways stations will transmit on frequency of 135 mc and receive on 135.90 mc for USAF aircraft; in the case of Navy aircraft will transmit and receive on 135.90 mc; and for Coast Guard aircraft as required by current method of operation.

✓ NEW IFR POSITION REPORT PROCEDURE FOR MILITARY AIRCRAFT FLYING ABOVE 17,200 FT: Effective March 15, 1951, the normal requirement for position reports under IFR at each designated compulsory reporting point will not apply to aircraft flying above 17,200 feet. All aircraft flying above 17,200 ft will designate established reporting points or other check points describing the route of flight in the flight plan on the basis of one (1) reporting point each 200 miles. IFR position reqports will only be required at these previously designated points and if necessary at any additional points requested by ARTC. Jet pilots should take full advantage of this position reporting procedure.

✓ CHANGES FOR AN 08-15-2: The areas of responsibility for Air Rescue Service Zone of Interior organizations outlined on page 44 of AN 08-15-2 have changed as follows:

(1) Flt A, 4th Air Rsq Sq, Hamilton AFB, Calif. is responsible for the following states: Utah, Nevada and that portion of Calif. N of 35°30' N lat.

(2) Flt B, 4th Air Rsq Sq., March AFB, Calif. is responsible for the following states: Arizona, New Mexico and that portion of Calif. S of 35°30' N. lat.

(3) Flt C, 4th Air Rsq Sq, McChord AFB, Wash. is responsible for the following states: Idaho, Montana, Oregon and Washington.

(4) Flt D, 4th Air Rsq Sq., Lowry AFB, Colo. is responsible for the following states: Colorado, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, Wyoming.

(2-27-51)

(5) Flt A, 5th Air Rsq Sq., Westover AFB, Mass. is responsible for the following states: Connecticut, Delaware, Maine, Maryland, Mass., New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia.

(6) Flt B, 5th Air Rsq Sq., Ellington AFB, Texas is responsible for the following states: Arkansas, Louisiana, Oklahoma and Texas.

(7) Flt C, 5th Air Rsq Sq., Maxwell AFB, Ala. is responsible for the following states: Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina and Tennessee.

(8) Flt D, 5th Air Rsq Sq., Selfridge AFB, Mich. is responsible for the following states: Illinois, Indiana, Kentucky, Michigan, Ohio and Wisconsin.

Hq. 1st Air Rsq. Sq., MacDill AFB, Fla. and 6th Rescue Sq., Westover AFB, Mass. have been transferred to Albrook AFB, Canal Zone and Ernest Harmon AFB, Newfoundland respectively and should be deleted from listings for Page 45. Other listings for page 45 should be corrected as follows: Show Flight "A" of 4th Rescue Sq at Hamilton AFB. Show Flt D of 4th Rescue Sq. at Lowry AFB. Show Flt A of 5th Air Rescue Sq at Westover AFB.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: AL-387, dtd Jan 3, 51. Craig AFB, Selma, Alabama. Change min alt over airport 766' MSL, ceiling 600'.

CIVIL SPECIAL NOTICES

CIVIL DATA: The airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	119.5 mc	May 10, 1949
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Kansas City Center	120.3 mc	Feb. 8, 1951
New York Center	120.3 mc	Oct. 11, 1950
	120.7 mc	Jan. 25, 1950
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.7 mc	Nov. 2, 1950
Washington Center	120.3 mc	Sept. 1, 1949

✓FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no over-flights of foreign territory should be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

✓DISCONTINUANCE OF 6210 KC AT INSACS: All CAA Interstate Airway Communications Stations which presently maintain a receiving watch on 6210 kc will permanently discontinue this service effective April 1, 1951.

DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated, unless otherwise advised:

AMENDMENT 65 (March 6, 1951)

(1) The Milford, Delaware area, published on January 26, 1951, in 16 F. R. 713 is amended by changing the "Time of Designation" column to read: "Daylight hours only (when ceiling is at least 5000 feet and visibility is 3 miles or better, based on Dover AFB weather reports)"

(2) The Camp Breckinridge, Kentucky area, published on January 13, 1951, in 16 F. R. 344, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at Corydon, Ky. at lat. 37-44-30N, long. 87-42-30W; southerly to Dixie, Ky. at lat. 37-41-00N, long. 87-41-00W; SE to Poole, Ky. at lat. 37-38-30N, long. 87-39-00W; SW to Tilden, Ky. at lat 37-36-30N, long. 87-41-30W; WNW to Boxville, Ky. at lat. 37-37-30N, long. 87-49-30W; NW to Morganfield, Ky. at lat. 37-41-00N, long. 87-55-00W; ENE to Waverly, Ky. at lat. 37-42-45N, long. 87-49-00W; ENE to Corydon, Ky. at lat 37-44-30N, long. 87-42-30W, point of beginning."

(3) The South Wellfleet, Massachusetts area, published on April 21, 1949, in 14 F. R. 1913, under Wellfleet, Massachusetts, amended on July 27, 1949, in 14 F.R. 4665, and on March 11, 1950, in 15 F.R. 1329, is revised to read: Location: South Wellfleet (Boston Chart); Description: Area I: Beginning at lat. 41-56-00N, long. 69-58-30W; NNW to a point 3 nautical miles from the shoreline at lat. 42-05-55N, long. 70-02-10W; SSE paralleling the shoreline at a distance of 3 nautical miles to lat. 41-48-30N, long. 69-51-50W; NW to lat. 41-56-00N, long. 69-58-30W, point of beginning; Altitudes: Unlimited; Time: Continuous; Using Agency: Hdqs. 1st Army, Governors Island, New York.

AREA II: Beginning at lat. 41-52-39N, long. 69-59-00W; N to lat. 41-54-55N, long. 69-59-05W; ENE to the W boundary of Area I at lat. 41-55-05N, long. 69-58-00W; S along W boundary of Area I to lat. 41-52-50N, long. 69-55-50W; W to lat. 41-52-39N, long. 69-59-00W, point of beginning; Altitudes: Surface to 3000 feet; Time: Sunrise to sunset, 7 days a week; Using Agency: 33rd Fighter Interceptor Wing, Otis AFB, Falmouth, Mass.

(4) A Ft. Sill, Oklahoma, area is added to read: Location: Ft. Sill (Oklahoma City Chart); Description: N boundary: lat. 34-47-00N; E boundary: long. 98-21-00W; S boundary: lat. 34-38-00N; W boundary: long. 98-24-00W; Altitudes: Surface to unlimited; Time: Continuous, March 7, 1951 through March 8, 1951; Using Agency: Ft. Sill Artillery School, Ft. Sill, Okla.

(5) The Dahlgren, Virginia area published on April 21, 1949, in 14 F. R. 1913, and amended on July 27, 1949, in 14 F.R. 4665, is further amended by changing the "Description by Georgraphical Coordinates" column of the West Area to read: "Beginning at lat. 38-28-20N, long. 76-57-00W; SSE to lat. 38-18-00N, long. 76-54-00W; ESE to lat. 38-14-40N, long. 76-43-25W; SSE to lat. 38-13-25N, long. 76-42-50W; SSE to lat. 38-11-10N, long. 76-42-20W; SW to lat. 38-09-55N, long. 76-44-00W; W to lat. 38-10-00N, long. 76-46-00W; westerly along S shore of the Potomac River to lat. 38-16-00N, long. 76-58-50W; WSW to lat. 38-13-10N, long. 77-07-00W; WNW to lat. 38-21-30N, long. 77-09-50W; NNE to lat. 38-27-00N, long. 77-06-35 W; ENE to lat. 38-28-20N, long. 77-01-10W; due E to lat. 38-28-20N, long. 76-57-00W, point of beginning". The East Area remains unchanged.

ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established:

CARTERSVILLE INTSXN - the intsxn of the E crs Rome, Ga. rng and the NW crs Atlanta, Ga. (LF) rng

WATTS INTSXN - the intsxn of the NE crs of Chattanooga, Tenn. and the W crs of Knoxville, Tenn. rng.

SHERWOOD FOREST INTSXN - the intsxn of the S crs of Baltimore, Md. and a 75° true bearing from Riverdale, Md. Rbn.

NON-STANDARD HOLDING PATTERN: Effective immediately the following non-standard holding pattern is established: Holding point - Augusta, Ga. LF rng; Direction from holding point: W; Direction of turn - LEFT on N side of W crs; Time: 2 minutes.

AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA AMENDMENT: Effective immediately the Kansas City-Chicago air route traffic control and flight advisory area boundaries on Red 12 are amended as follows: ARTC boundary is relocated to a point 15 miles SW of Burlington, Iowa.

Flight Advisory Area is now reestablished - from ARTC boundary on Green 3. 25 miles W of Iowa City, Iowa to ARTC boundary on Red 12, 15 mi. SW of Burlington, Iowa to 40-25 N, 91-15W, thence to ARTC boundary Red 89, 50 mi NE of Quincy, Ill.

CORRECTION TO AIRMAN'S GUIDE: Correct Vol 5, No. 23, page 91 as follows: Control area extension Moses Lake, Wash. "All that area S of Green 2 within 30 mile radius of Larson AFB exlcuding portions overlapping Moses Lake Danger Area and the Hanford Airspace Reservation."

Correct Vol. 5, No. 24 as follows:

(1) Page 92. Control Areas: (1) Green Civil Airway No. 3..... and from the Philipsburg, Pa. omnirng stn to the Allentown, Pa. omnirng stn via the Philipsburg 120 ° mag. and the Allentown 268° mag. alt change radials, excluding that portion which lies more than 4 miles S of the Allentown, Pa. omnirng 268° alt change radial.

(2) Control Area Extensions - Control area extension Zanesville, Ohio is revoked.

(3) Control area extension Windsor Locks, Conn. is added to read: All that area in the vicinity of Bradley Field, Windsor Locks, Conn. bounded on the SW and W by Blue 41, on the NW by Red 33, on the NE by Green 2 and on the E by Amber 7 and all that area SW of Bradley Field bounded on the NW by Red 33, on the NE by Blue 41 and on the S by Red 13.

(4) Control area extension Erie, Pa. is added to read: All that area within a 15 mile radius of the Erie, Pa. omnirng stn.

(5) Control area extension Tampa, Fla. is added to read: All that area along a straight line between the Tampa, Fla. rdo rng stn and the Tyndall AFB, Fla. rdo rng stn, extending 5 miles either side of the line at the rdo rng stns thence diverging to 10 miles either side of the line at a point half way between the rdo rng stns, excluding the portion which overlaps danger areas and excluding that portion below 2000' which lies outside the continental limits of the United States.

(6) Page 93, paragraph 12. Control area extension Miami, Fla. is corrected to read: .....and a point on the coastline at lat. 25-48-50, long.81-30-40.....

(7) Page 93, paragraph 18. Control area extension Miami, Fla. is corrected to read: ..... the western boundary of the Miami Oceanic/Nassau Control area at lat. 25-55-00, long. 79-00-00.....

THE FOLLOWING BEACON SITES WILL BE RECOMMISSIONED ON OR ABOUT MARCH 15:

CHI-Twin Cities	SITE	MKC-CHI	SITE
Sylvan, Wisconsin	18	Sheridan, Ill.	35
Hampshire, Ill.	4		
		MKE-LCS	
DAL-LOU		Johnson Creek, Wis.	4
Bonnieville, Ky.	74		
Hodgenville, Ky.	76	OMA-BIS

West Bergen	22	Biddeford	8
Palmyra	26	Yarmouth	11
Lyons	27B	Litchfield	13
Jordan	30		

(2-27-51)

✓INSTRUMENT APPROACH PROCEDURES: The following standard instrument approach procedures have been CANCELLED. Low Frequency Range: McChord (Tacoma), Wash., McChord AFB (Procedure No. 2), effective Feb. 9, 1951. Automatic Direction Finding: Old Town, Me., Old Town Arpt., effective Jan. 12, 1951.

✓VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with Omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI) the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

Automatic Indicating Receivers: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is 0° which is automatically indicated when the receiver is turned on and tuned to the correct frequency.

AIRPORT AND RADIO NOTICES

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
✱ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (1-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (1-30)

REGULATIONS OF THE ADMINISTRATOR
PART 620 – EFFECTIVE DEC. 27, 1950
SECURITY CONTROL OF AIR TRAFFIC

The regulation reads in part as follows.....

SUBPART B - OPERATING RULES

620.10 Scope. Aircraft shall not be operated into or within an Air Defense Identification Zone (ADIZ) prescribed by the Administrator in Subpart C of these regulations, in violation of the following rules:

620.11 Flight Plans. Unless otherwise authorized under section 620.13, prior to penetrating and ADIZ or prior to take-off from a point within an ADIZ, a flight plan shall be filed with an appropriate aeronautical facility. Such flight plan shall contain:

(a) For IFR flights, the information specified in section 60.41 of the Air Traffic Rules of Part 60 of the Civil Air Regulations. (14 C.F.R, Part 60).

(b) For VFR flights, unless an abbreviated flight plan is authorized the information specified in paragraphs (a) through (g) inclusive and (i) and (j) of Section 60.41 of the Air Traffic Rules. (14 C.F.R., Part 60). Such a flight plan shall be designated by the pilot in command as a Defense Visual Flight Rule (DVFR) flight plan.

620.12 Reporting Points

(a) Flight within or penetrating a Domestic ADIZ or entering the United States across an International Boundary ADIZ - Unless otherwise authorized under section 620.13:

(1) IFR Flights - Position reports shall be made as required by Section 60.47 of the Civil Air Regulations. (14 C.F.R., Part 60).

✱ (2) DVFR Flights - The pilot in command of an aircraft shall not enter or operate within an ADIZ unless the aircraft is equipped with a functioning two-way radio and shall not enter an ADIZ until he has reported to an appropriate aeronautical facility either (a) the estimated time, position, and altitude at which he will penetrate the ADIZ or (b) the time, position, and altitude at which the aircraft passed the last reporting point along the flight path of the aircraft prior to penetration of an ADIZ and his estimated time over the next reporting point along the intended flight path of the aircraft.

NOTE: Whenever it shall appear that the previously filed estimate is in error, as to time by more than five minutes, or as to position by more than 20 miles, a corrected estimate shall be filed with an appropriate aeronautical facility.

(b) Aircraft entering the United States through a Coastal ADIZ:

(1) United States aircraft - The reports prescribed in paragraph (a) of this section are required.

(2) Foreign aircraft - Prior to entering the United States, Foreign aircraft shall (A) make position reports as prescribed for United States aircraft in paragraph (1) above or (B) in lieu thereof, the pilot in command of a foreign aircraft operating under either Instrument of Visual Flight Rules shall report to an appropriate aeronautical facility when the aircraft is not less than one hour and not more than two hours average cruising distance via the most direct route, from the United States. Thereafter, reports shall be made as instructed by the facility receiving the original report.

NOTE: Operators of foreign aircraft who exercise the optional position reporting method described in subsection (B) above are cautioned that this procedure does not eliminate the position reporting requirements prescribed for the control of air traffic.

620.13 Authorized Exceptions:

✱ (a) Intra-Zone VFR flights. A CAA airways operation facility exercising security control may, under certain conditions, authorize VFR flights which are (1) local, (2) between points located within the boundaries of an ADIZ, or (3) from points within an ADIZ to points outside thereof, without compliance with the flight plan and reporting requirements of sections 620.11 and 620.12. Such flights shall be operated in accordance with the instructions, if any, issued at the time the authorization is granted.

(b) Altitude Limitations. The provision of sections 620.11 and 620.12 are not applicable to aircraft operating within the Knoxville, Albuquerque, Los Angeles, San Francisco and Northwest Air Defense Identification Zones at altitude less than 4,000 feet above the immediate terrain or to aircraft entering these same Air Defense Identification Zones from within the continental limits of the United States at altitudes less than 4,000 feet above the immediate terrain.

620.14 Air Defense Security Instructions. Under emergency defense conditions which may involve the national security, aircraft shall be operated into or within an ADIZ in accordance with such additional special security instructions issued by the Administrator as may be deemed necessary for the identification, location and control of the particular flight.

NOTE: Such instructions will be designated as "Air Defense Security Instructions." Emergencies involving the national security may require the exercise of special control for identification purposes. In such cases instructions may be issued requiring identification turns, flight in a specified direction or location, or such other instructions as may be necessary.

620.15 Adherence to DVFR Flight Plans and Air Traffic Clearances

(a) IFR Flights -

(1) Within Control Zones and Areas - No deviation shall be made from an IFR flight plan unless an amended clearance is obtained from CAA air traffic control through an appropriate aeronautical facility as provided in the air traffic rules, section 60.21 of the Civil Air Regulations (14 C.F.R. 60, as amended).

(2) Outside Control Zones and Areas - When a flight is conducted in accordance with IFR within or into an ADIZ where an air traffic clearance is not required by the Civil Air Regulations, no deviation from the flight plan, as filed, shall be made unless prior notification is given to an appropriate aeronautical facility.

✱ (b) DVFR Flights - No deviation shall be made from a DVFR flight plan unless prior notification is given to an appropriate aeronautical facility, except, that a pilot may, when within 20 miles of his destination, commence his descent from cruising altitude without making a report of change in altitude.

620.16 Emergency Situations. In emergency situations which require immediate decision and action for the safety of the flight, the pilot in command of the aircraft may deviate from the provision of this part to the extent required for such emergency. When a deviation is exercised the pilot in command shall report such deviation and the reasons therefor, as soon as practicable to an appropriate aeronautical facility.

620.17 Radio Failure

(a) IFR Flights - In case of the failure of two-way radio communications, the pilot in command of the aircraft shall take the action required by Section 60.49 of the Civil Air Regulations. (14 C.F.R. Part 60 as amended).

(b) DVFR Flights - In case of the failure of two-way radio communications the flight may proceed in accordance with the original DVFR flight plan and the pilot in command of the aircraft shall make a report of such failure, as soon as possible, to an appropriate aeronautical facility.

620.18 Violations. In addition to the penalties otherwise provided for by the Civil Aeronautics Act of 1938, as amended, any person who knowingly or willfully violates any provision of the regulations prescribed in this part, or any order issued thereunder shall be deemed guilty of a misdemeanor and upon conviction thereof, shall be subject to a fine of not exceeding $10,000 or to imprisonment not exceeding one year, or to both such fine and imprisonment.

✱ Denotes corrected paragraphs effective on or about February 15, 1951, upon publication in the Federal Register.

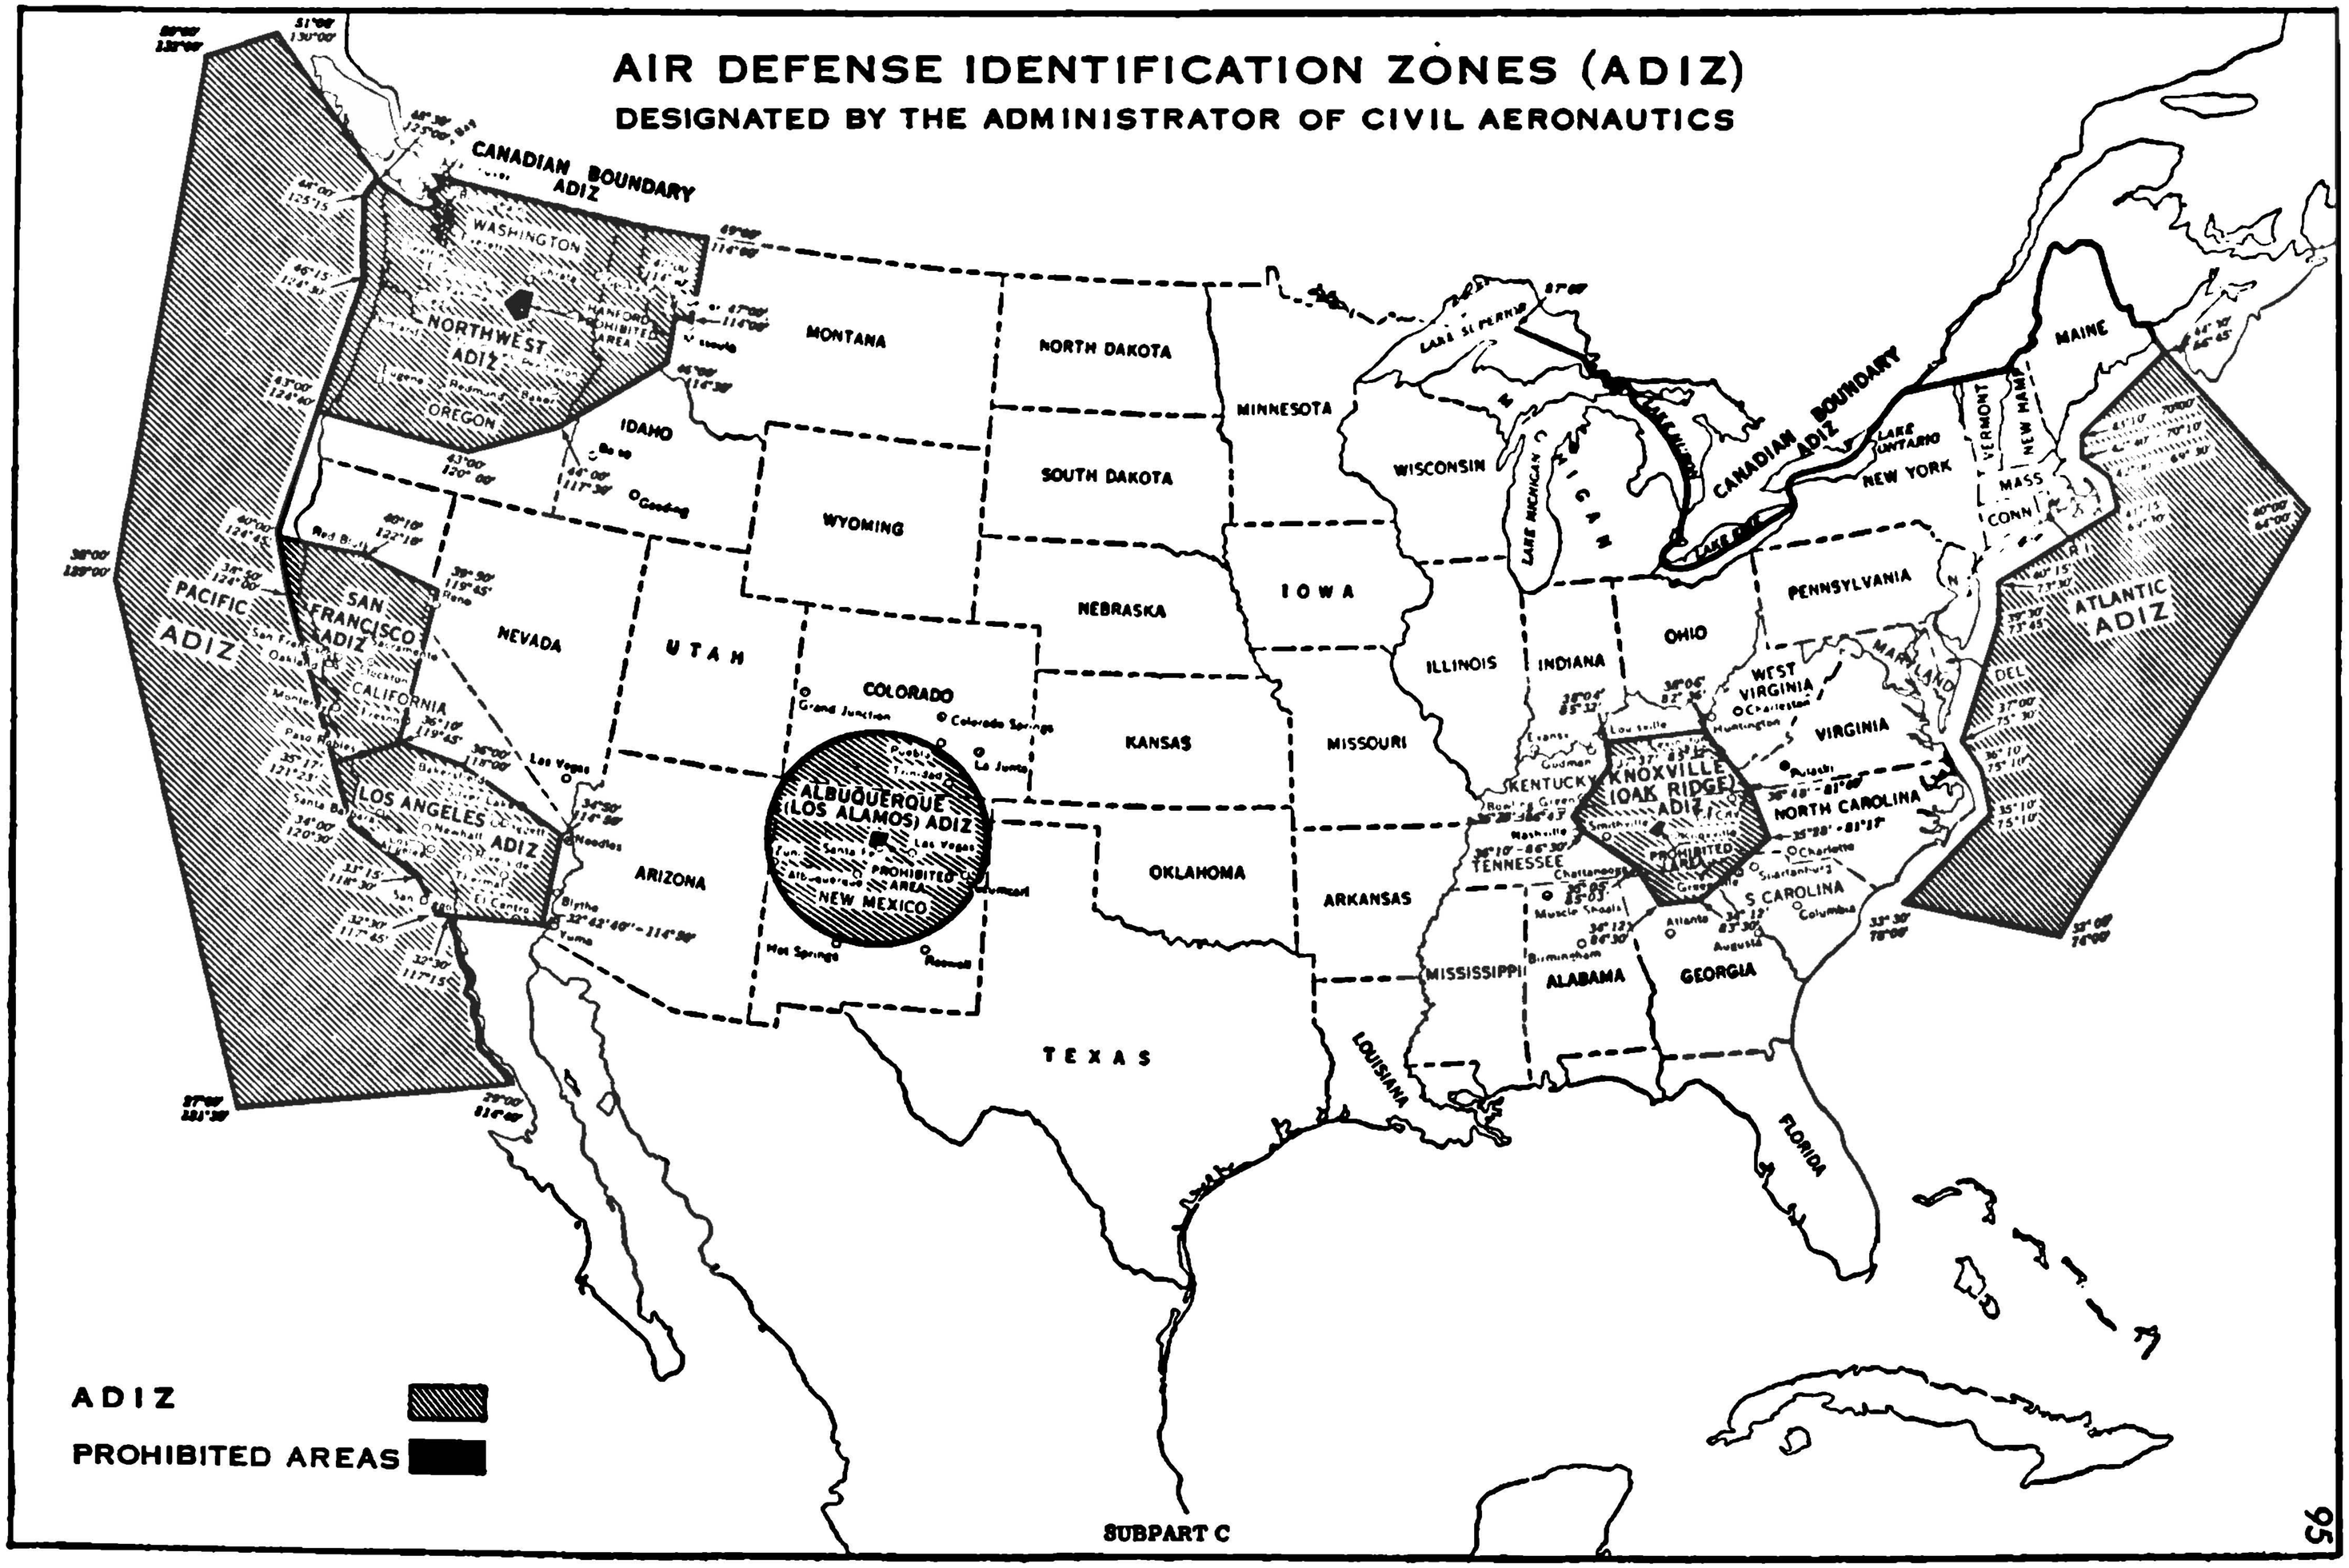
AIR DEFENSE IDENTIFICATION ZONES (ADIZ)

DESIGNATED BY THE ADMINISTRATOR OF CIVIL AERONAUTICS



IMPENDING CHANGES IN AERONAUTICAL DISTANCE AND SPEED UNITS

All CAA air-ground communications within the continental United States and Alaska will change over to the use of nautical miles for horizontal distance and visibility and knots for horizontal speed on July 1, 1952. These changes are necessary in order to conform to international practices.

Basically, a nautical mile is the length of a minute of latitude at sea level, or the length of a minute of longitude at sea level at the equator. This distance is 6,080.20 feet, as compared to 5,280 feet for the common or statute mile. Since the ratio 6,080/5,280 is equal to 1.15, and the ratio 5,280/6,080 is equal to .87, it is apparent that the number of statute miles is 115% of the number of nautical miles, or the number of nautical miles is 87% of the number of statute miles. Furthermore, if the fraction 6,080/5,280 is reduced to lowest terms, we obtain 38/33, indicating that 38 statute miles are equal to 33 nautical miles.

Furthermore, practically all air navigational computers provide quick and easy conversions of nautical miles to statute miles, or vice versa, so no difficulties should be experienced by anyone who will attempt to inform himself as to the relationship of the units and with at least one of the various methods of conversion. Attention is specifically called to the fact that the knot is a unit of speed and not a unit of distance, being equal to nautical miles per hour.

Conversion Tables for Statute and Nautical Miles
(To the nearest hundredth)

1 nautical mile = 6,080.20 ft. 1 statute mile = 5,280.00 ft.

Statute - Nautical		Nautical - Statute	
1	0.87	1	1.15
2	1.74	2	2.30

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - **The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).**

PRECISION APPROACHES-Aircraft **are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.**

SURVEILLANCE or PPI APPROACHES - **Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.**

CAA RADAR UNITS - **Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.**

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

STATION	TRANSMITS	WEA. MINIMUMS Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.

AIR FORCE GCA UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL AIR FORCE UNITS TRANSMIT ON AND GUARD THE FOLLOWING CHANNELS (FREQUENCIES): B=126.18; C=137.88; D=121.5; G=136.80; H=134.1; 142.02 mc; 3475, 4890 and 6640 kc.

STATION	Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.
Andrews AFB, Md.	529	250	1(D)1½(N)	Cont. Grds 4495
Barksdale AFB, La.	417	250	1(D)1½(N)	Cont IFR; 10-23 daily; 30 min notice other hrs.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
↙ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . . Without voice facilities
Z. . . . VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuou are cited in the class column with hours of operation in parentheses, e.g., (6-2
4. When a VHF is controlled by an associated LF range, because of space limitati DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications static and control towers the frequency on which the reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - airway field

(36) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast Guard Air Station
MCAS - Marine Corps Air Station

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE

V...108.7				∞
W..109.1				∞
X...109.5				∞
Y...109.9				∞
Z...110.3				∞

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as requirec by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

IMPLEMENTATION OF 135.90 MC AS CAA AIRWAYS FREQUENCY: Discontinuance of 140.58 mc as CAA airways station frequency and implementation of 135.90 or 135.9/135 originally scheduled for March 1, 1951, has been postponed to 1700Z April 1. In order to improve communications on Channel A, simplex operation on USAF aircraft will be changed to single channel duplex operation for that channel at that time; a receiving crystal on 135 mc and a transmitting crystal on 135.90 mc will be installed in Channel A to replace 140.58 mc. Navy aircraft will continue to operate on a simplex basis and the frequency of 135.90 mc will replace 140.58 mc in Navy Channels 1 and D. Coast Guard aircraft will on April 1 use 135.90 mc simplex in lieu of 140.58 mc but will in the near future convert equipment so as to transmit on 135.90 mc and receive on 135 mc. CAA airways stations will transmit on frequency of 135 mc and receive on 135.90 mc for USAF aircraft; in the case of Navy aircraft will transmit and receive on 135.90 mc; and for Coast Guard aircraft as required by current method of operation.

NEW IFR POSITION REPORT PROCEDURE FOR MILITARY AIRCRAFT FLYING ABOVE 17,200 FT: Effective March 15, 1951, the normal requirement for position reports under IFR at each designated compulsory reporting point will not apply to aircraft flying above 17,200 feet. All aircraft flying above 17,200 ft will designate established reporting points or other check points describing the route of flight in the flight plan on the basis of one (1) reporting point each 200 miles. IFR position reqports will only be required at these previously designated points and if necessary at any additional points requested by ARTC. Jet pilots should take full advantage of this position reporting procedure.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) MacDill AFB, Tampa, Fla. Standard procedure utilizing Tampa rdo, freq. 388 kc, ident: TPA, is now authorized. Weather minimums: 500-1 day, 500-2 ngt. Initial apch: NE - 1500' from Orlando rdo rng; SE - 1300' from intsxn NE crs Ft. Myers rdo rng; SW - minimum enroute alt; N - 1300' from intsxn SE crs Cross City rdo rng. Final apch crs - NE. Procedure turn E side NE crs 1500' within 25 miles. Alt over Tampa rdo rng on final apch 1000' MSL. Magnetic bearing and distance from Tampa rng to aerodrome 210°, 2.3 mi. Missed apch: climb to 1500' MSL on SW crs.

(2) AL-26, dtd Jan. 11, 51. Atlanta (Arpt), Ga. Initial apch NW crs 4000' from CHA rng 2300' from Smyrna FM. Alt missed apch procedure (when directed by ATC), climb to 3500' on NW crs ATL rng.

(3) AL-457, Aug. 22, 50. Williamsport, Pa. Initial apch SE crs 3500' from intsxn SW crs Wilkes-Barre rng; South - 3500' intsxn E crs Philipsburg rng. Procedure turn S side SE crs 2500' within 25 miles. Alt over Williamsport rng on final apch 2000' MSL. Missed apch if ctc not within 0 miles after passing Williamsport rng, make a climbing rgt turn to 3500' on the SE crs. Caution ridge 2000' MSL 2 miles S of arpt.

(4) AL-185, Dec. 22, 49. Langley AFB, Hampton, Va. Min alt over aerodrome 510' MSL, ceiling 500'.

(5) Otis AFB, Falmouth, Mass. ADF procedure utilizing Falmouth rdo ben freq. 362 kc, ident. FMH is now authorized. Wea minimums - 500-1 day, 500-2 ngt. Initial apch from PVD rdo 111°, 48 miles, min alt 2000' MSL. Final apch track 210° mag outbound. 30° mag inbound. Procedure turn E side of track 1500' within 15 miles. NA beyond 15 miles. Alt over FMH on final apch 800' MSL. Mag track and dist FMH to aerodrome 30°, 3.4 miles. If visual ctc not established at authorized minimums or lndg not accomplished, climb on track of 30° for one minute execute 180° turn and home on FMH at 2000'. Ctc Otis twr for further instructions.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U.S.: (1) AL-324, July 21, 50. Pierre, S. Dak. Initial apch N 3300' from Bismarck rng, W 3500' from Phillip "H" or VOR.

(2) AL-327, July 29, 49. Pocatello (Phillips) Idaho. Alt over rng stn on final apch 4940' MSL.

(3) AL-365, Jan 24, 51. Salt Lake City (Mun No. 1), Utah. For USAF use min alt over aerodrome 4822', ceiling over aerodrome 600'.

(4) Seattle NAS, Wash. Standard instrument procedure for Seattle NAS is now authorized utilizing Seattle NAS rdo rng, type MRLZ, freq. 212 kc, ident. NEJ. Minimum ceiling for USAF 1000'. Initial apch N minimum enroute alt 1600' after passing int W crs Everett rng. East minimum enroute altitude, 2000' after passing int NE crs Seattle rng. South minimum enroute alt 2000' after passing intsxn NE crs Seattle rng. West minimum enroute alt 2000' after passing int NW crs Seattle rng. Final apch crs N, procedure turn W side N crs 1800' MSL within 15 miles, 2000' within 20 miles, NA beyond 20 miles. Altitude over Navy Seattle rng on final apch 1600' MSL. Mag. crs and dist Navy Seattle rng to arpt: 143°, 6.1 miles. CIVIL SPECIAL NOTICES

CIVIL DATA: The airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

✓DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	120.3 mc	May 10, 1949
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Kansas City Center	120.3 mc	Feb. 8, 1951
New York Center	120.3 mc	Oct. 11, 1950
	120.7 mc	Jan. 25, 1950
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.9 mc	Nov. 2, 1950
Washington Center	120.3 mc	Sept. 1, 1949
Seattle Center	120.3 mc	March 8, 1951

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no over-flights of foreign territory should be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

✓AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA BOUNDARY REVISIONS: Effective immediately the Salt Lake City-Oakland-Seattle air route traffic control and flight advisory area boundaries are relocated as follows:

SEATTLE-SALT LAKE CITY, from 65 mi. SE of Boise, Idaho on Red 1 along long. 115°20'W, to junction with lat. 42°00'N, thence W along lat. 42°00'N to long. 121°00'W; S along long. 121°00'W to junction with lat. 41°20N, thence W along lat. 41°20'N to long. 123° 10'W; N along 123°10'W to lat. 42°00'N, thence W along lat. 42°00'N seaward to the ICAO boundary.

OAKLAND-SALT LAKE CITY, from lat. 42°00'N, long. 117°42'W; S along long. 117° 42'W to its junction with Green 3, approx. 25 mi. NE of Lovelock, Nevada.

Air route traffic control area boundaries coincide with points where flight advisory boundaries cross airways.

✓DANGER AREA DESIGNATIONS: The following Danger Area amendment shall become effective on March 16, 1951, unless otherwise advised:

AMENDMENT 66

The Oswego County, New York, area, published on April 11, 1950, in 15 F.R. 2036, and amended on August 18, 1950, in 15 F.R. 5497, is further amended by changing the "Time of Designation" column to read: Continuous, April 11, 1950 through June 30, 1951".

✓EXECUTIVE ORDER NO. 10218 - ESTABLISHING AN AIRSPACE RESERVATION OVER THE LAS VEGAS PROJECT, LAS VEGAS, NEVADA:

By virtue of the authority vested in me by Section 4 of the Air Commerce Act of 1926, the airspace above the following described portion of the United States is hereby reserved and set apart for national defense and other governmental purposes as an airspace reservation within which no person shall navigate an aircraft except by authority of the United States Atomic Energy Commission:

All that area within the United States lying within the following-described boundaries:

> Beginning at lat. 37°16'00", long. 115°56'00"; due S to lat. 36°41'00", long. 115°56'00"; due W to lat. 36°41'00", long. 116°13'00"; due N to lat. 37°16'00", long. 116°13'00"; due E to lat. 37°16'00", long. 115° 56'00", the point of beginning.

Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938.

Effective date: February 28, 1951 Harry S. Truman

✓CORRECTION TO RF CHARTS: Correct RF Chart #35A, back section, under Baltimore Harbor by changing tower call from Baltimore tower to Harbor tower.

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with Omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI) the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

Automatic Indicating Receivers: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is 0° which is automatically indicated when the receiver is turned on and tuned to the correct frequency.

AIRPORT AND RADIO NOTICES

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
✱ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (1-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (1-30)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (3-9) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will letdown S of Mobile to avoid Bates Fld and G-6 Arwys tfc. (1-29)
**HENDERSON AF AUX (MILLERS FERRY): Reinstated. Lat 32-07-15, long. 87-22-00. (2-28)

LITTLE ROCK-ADAMS ARPT-TOWER: Transmission and reception poor on all VHF freqs S to W account obsts near temp twr until approx May 15, 1951. Apch ctl on 353 kc shut down until approx May 15. (3-7) FLD: Use ctn lndg NE or N, vision of ctl twr partially obstructed. (3-10) Lmtd NG svcg avail. (10-24)
MANILA ARPT: Clsd (const). (3-4)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
CALIFORNIA: ARCATA ARPT: Ctn - const days. Use rnwys only. (2-7)
BAKERSFIELD-RADIO: About March 19, omnirng will be shut down until approx May 19. (3-1)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat. 34-13-00, long. 119-05-00; thence to lat. 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat. 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea. conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable - use for homing only. X-band radar bcn (AN/CPN-6) inop. (3-5)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (11-9)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CULVER CITY-HUGHES ARPT: Entire fld clsd xcpt NW half Rnwy 4-22. Usable portion mrkd day, ngt. Clsd trans acft xcpt on prior permission. (3-9)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-3)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (3-11)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAMILTON AFB-RADIO: Temp. compass lctr operg on 219 kc has been installed at lat. 38-02-56, long. 122-29-44. Operg with voice and ctld by twr. Bear., dist to Rnwy 30: 300°, 1300'. Oper cont. (12-16)
HAMILTON AFB (SAN RAFAEL): Ctn - const on Rnwys 12-30. (9-21)
**HANFORD ARPT: Correct lat. 36-19-00, long. 119-38-00. (3-8)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruisingspeed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (1-3)
LONG BEACH-EAST LONG BEACH ARPT: Strip 21 under const. Use oiled area for lndg and take-offs. (1-29)
LOS ANGELES-CENTRAL ARPT: About April 15, fuel and svcg will be discontd. About May 1, fld will be perm clsd. (3-7)
LOS ANGELES INTN'L ARPT-TOWER: Temp ILS lclzr, channel "Y" 109.9 mc comm, serving Rnwy 25L. Ident: LAX. Course aligned on centerline at apch end Rnwy 25L. About Mar. 12, twr voice fac on 278 kc will be combined with and lctd at CAA ILS LMM fac. Present LMM freq 219 kc will be discontd. LMM ident. "AX" will be removed during voice transmission. (2-23) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. 100' crane and equip on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily except Sat and Sun. (2-21)

CALIFORNIA: MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
MONTEREY-PENINSULA ARPT: Equip end Rnwy 28. Observe twr for lgts in addition to rdo clearance. (2-1)
**NOVATO ARPT: Four 5000' obst lgtd twrs Rdo Stn KCBS erected 1.5 mi E (103° T) at lat. 38-08-20, long. 122-31-35. (2-19)
OAKLAND-RADIO: Omnirng max. usable dist. 40 mi N thru E at minimum instr alt. (2-28)
**OAKLAND ARPT: Hi-intensity apch lgts commd on Rnwy 9L-27R. (3-8) Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and indg area from hangar 3 to W bndry. (3-8)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. No opers Sat, Sun, or holidays. (3-5)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 600'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint. at least 1500' over Coronado. Amphibious Base, tfc lanes at North Island. (2-21)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO-RADIO: Omnirng on 117.6 mc may be unreliable due to const of pipe line in vcnty of transmitter. Limited communication possible on 122.1 mc because of blocking interference from another freq. (1-26)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip on fld. (1-26)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end of Rnwy 25 perm clsd to acft with 20,000 lbs. or more gross wt. (5-30)
SANTA MONICA ARPT: Ctn - one medium intensity rnwy lgt 17" above gnd on S side Rnwy 21, 800' from E end, operg on test basis. (3-9)
**TULE LAKE ARPT: New fld. Lat 41-53-15, long. 121-21-30. (2-12)
COLORADO: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U. S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)
**DENVER NAS (BUCKLEY FLD): 100' obst lgtd rdo twr erected 7.5 mi E (105° T) at lat. 39-40-00, long. 104-37-00. (1-22)
**FT. MORGAN-YOUNG ARPT: 63' obst lgtd rdo twr erected 6 mi NE (60°T) at lat 40-23-00, long. 103-42-00. (1-22)
GREELEY ARPT. Hazardous - drifting snow. Lnd at own risk. (2-12)
**HOYT, BCN SITE 4, DEN-GRI: Feb. 26, site commd flash. code 4, dot dot dot dot.
**LIMON ARPT: Correct lat. 39-16-30, long. 103-39-45. (11-29)
LOWRY AFB (DENVER)-RADIO: USAF VHF/DF flgt-checked unsatisfactory - avail for practice steers only. (1-14)
**PROSPECT VALLEY: 200' obst lgtd rdo twr erected 6.5 mi E at lat 40-04-00, long. 104-18-00. (1-22)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-06, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of Mar. (3-2)
PUEBLO ARPT-TOWER: About Apr 2, CAA twr transmitter and rcvr 119.5 mc will be changed to 119.1 mc. (3-9)
**STERLING ARPT: 175' obst lgtd rdo twr erected 10 mi S (180°T) at lat 40-28-00, long. 103-16-00. (1-22)
THURMAN-RADIO: Omnirng will be shut down for a 15 min period each day until approx April 1. (3-2)
CONNECTICUT: E. HARTFORD-RENTSCHLER ARPT: VFR flgt test opers days all alts in 75 mi radius. (1-4)
HARTFORD-RADIO: Auto. rng monitor. discontd. (2-21) (Erroneously listed under Bridgeport in Airgi Vol. 5, No. 25)
HARTFORD-BRAINARD ARPT-TOWER: About March 29, transmitter and rcvr will be changed from 119.5 mc to 119.9 mc. (3-8)
WINDSOR LOCKS-BRADLEY FLD-TOWER: About March 29, transmitter and rcvr will be changed from 119.9 mc to 119.5 mc. (3-8)

DELAWARE: DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (12-12)
DOVER AFB: No svcg trans acft. (9-14)
WILMINGTON-NEW CASTLE CO. ARPT: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs being erected across Delaware Riv 4 mi ENE. (12-1) Excavation edges N/S Rnwy. Equip on fld days. (1-10) Lgts N/S Rnwy inop-lgtd with flarepots sunset to sunrise. (3-9)

DIST. OF COLUMBIA: ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let-down procedures, incig "TIMED APCHS". (11-1)
WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac Riv. Acft remain clear of U. S. Naval Medical Center, Bethesda, Md., lat 39-00-30, long. 77-05-30.
WASHINGTON-RADIO-SPECIAL NOTICE: The following facs are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress:

1. DF and Radar Net
   A. ARTC
   B. National MEW (radar) Washington
   C. Anacostia NAS (tower DF)
   D. Quantico MCAS (tower DF)
   E. Andrews AFB (DF room)
   F. Andrews AFB (CPN-18 radar)
   G. Patuxent NAS (tower DF)
   H. Patuxent NAS (instrument control room)
   I. Patuxent NAS (radar)

Acft desiring assistance should contact one of above agencies on 121.5 mc. (2-23)
WASHINGTON-RADIO: Huntingtown, Md FM operg on test-basis. Lctd SE crs at lat 38-34-36, long. 76-38-29. Elev 82' MSL. Ident: two dashes. (3-10) See Huntingtown, Md MHW fac lctd at same site.
WASHINGTON NATIONAL ARPT-TOWER: About Mar 26, CAA ILS lclzr freq 109.9 mc will be shut down until approx Mar 29. (3-9) FLD: USAF, NAVY, CG: Clsd to all acft except: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., C. G., and will be flown VFR conditions only). (e) CG acft hangared at WNA. (f) USAF acft assigned to WNA. NO acft over 120,000 lbs. without prior approval arpt director. CG acft taxi to CG Hangar #6 S of Admin. Bldg. Navy acft taxi to MATS terminal N of Admin. Bldg. GENERAL: Fighter type acft (both civil and mil) prohibited. 2-way rdo rqrd. Use paved areas, shoulders soft. Equip on fld. Wea. Bur. exper observations approx 50' S of apch end Rnwy 36 when ceiling 600' or less and/or visibility 1.5 mi or less with ceiling balloons daylgt and ceiling lgt darkness. Standard timed apch procedures inaugurated utilizing current holding procedures. (12-15) Top level obst lgt on 510' twr Rdo Stn WHMB 15 mi N inop. (1-15)

FLORIDA: DAYTONA BEACH ARPT: Ctn - fence being erected adj bndry. (3-9)
EGLIN AFB (VALPARISO): Acft apchg fld enter area along rgt edge of S crs Crestview Rng. (1) Acft on VFR fly 3000' or 500' below the ceiling, which ever is lower until cleared by Eglin Twr. NORFOLK ARPT: All sod areas clsd. Taxying N side Rnwy 13-31, W side Rnwy 4-22 prohibited. Taxi strip between Rnwy 1-19 and Terminal Bldg clsd. (1-4)
NORFOLK NAS (EAST FLD): Equip on apch to Rnwy 28. (2-15)
**PARKSLEY ARPT: 140' obst lgtd rdo twr erected 1 mi SE (122° T) at lat 37-46-51, long. 75-39-32. (1-23)
PULASKI-RADIO: Omnirng radials 305° clockwise to 15° usable 25 mi at minimum inst alt 15° thru 55° and 195° thru 210° usable 40 mi at minimum inst alt. (2-9)
QUANTICO MCAS: Const. Ditches across and alongside N/S Taxiway. (1-9)
RICHMOND-RADIO: March 12, LF rng flgt-checked, courses correctly aligned.
RICHMOND-BYRD ARPT: Const between hangars E side taxiway parallel to and E Rnwy 15-33. (9-29)
WILLIAMSBURG-SCOTT ARPT: Const on ENE end ENE/WSW Strip. (1-26)
WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes. (1-12)
BELLINGHAM-RADIO: Omnirng radial 294°, which lies over Vancouver, B. C., has a usable dist of 20 mi account course roughness at the lowest instr. alt of 1500' MSL. Radial 40°, usable dist. 35 mi; 225° usable dist 40 mi. Omnirng 115.7 mc inop.
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate must register at CAA Commun Bldg. (6-8)
**CAMP BONNEVILLE: A Controlled Firing Area has been estab. and described as follows: N bndry: lat 45-42-30; S bndry: lat 45-40-20; E bndry: long. 122-22-30; W bndry: long. 122-26-00. Time of use: Daylgt hrs only. Activities: Artillery firing. Controlling Agency: Oregon Instructor Group, Vancouver Barracks, Wash.
ELLENSBURG-RADIO: Omnirng radials 42°, 157°, usable 30 mi; 52° usable 45 mi.
EVERETT-PAINE FLD: Trenches adj taxiway and E/W Rnwy, mrkd. Use rnwys, taxiways (2-5)
FAIRCHILD AFB (SPOKANE): Lmtd maint 0800-1700. (11-17)
FORKS ARPT: Ctn - const. Use taxi strip on S side of lndg strip only. (1-31)
KELSO-LONGVIEW ARPT: Taxiways clsd. N and E bndry lgts inop. (11-28)
McCHORD AFB (TACOMA)-RADIO: Soon, the following USAF elliptical-shaped FMs will be comm: Harts Lake FM on S course (10 mi) at lat 46-54-06, long. 122-28-28. Ident: three dashes. McChord FM on N course (8.5 mi) at lat 47-09-31, long. 122-28-31. Ident: one dash. Concurrently CAA Lakeview FM on S course Seattle rng will be perm discont. (3-8)
McChord AFB (Tacoma): Trans billeting avail emerg only. (7-27)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., Whidbey Island NAS. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-15)
PROSSER-BEARDSLEY ARPT: Clsd ngts. Ctn - const. Arpt will be clsd to all acft inter-

WASHINGTON: mittently. Mrkrs will be displayed. (11-16)
**RENTON-WILL ROGERS-WILEY POST MEMORIAL SEAPLANE BASE: Lctn: 1.7 mi W on Lake Washington. Ramps, mar rlwy, float, dolly haul-out, winch. Comb opers with Renton Arpt. (1-5)
SEATTLE-RADIO: Soon, Lakeview FM on S crs will be discontd. (3-8)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (1-31)
SEATTLE-TACOMA INTERNATIONAL ARPT: Equip on fld. (1-31)
SEATTLE NAS-RADIO: Bear, dist LF rng to Seattle NAS Arpt: 143°, 6.4 mi. (2-28)
SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of centerline Rnwy 14-32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-21)
SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi, SW and N 30 mi each. (1-5)
SPOKANE-RADIO: Omnirng crs have wide crs roughness with signal fades or surges. (1-30)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq. 201 kc. (12-21) BC narrow with unflyable bends. (2-26) FLD: Taxiway between Rnwy 2 and 34 clsd. Equip on fld. (12-13)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs. per wheel if tire pressure is under 85 lbs; or 35,000 lbs. if tire pressure is over 85 lbs. (2-21)
YAKIMA-RADIO: Omnirng radials 176°, usable 35 mi; 336°, 123° 40 mi; 321° 38 mi. About Mar. 16, omnirng will be shut down until approx Mar. 30 - modernization. (3-2)
WEST VIRGINIA: BECKLEY-MT. HOPE ARPT: Soft spots middle N/S Strip. Lnd on grass. (2-23)
CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not ctld by twr. Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. Hazard bcns lctd each end Rnwy 14-32 oper on test basis. (2-19)
ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)
MORGANTOWN-RADIO: SE crs LF rng displaced 3° N. (3-10)
PARKERSBURG-RADIO: SW crs VHF visual-aural rng slightly rough.
WHEELING-RADIO: Soon CAA ILS LMM will be comm. Freq: 230 kc, ident: LG.
WHEELING-OHIO CO. ARPT: Turf area clsd. Equip on fld days. Use rnwys, taxiways only. (1-26)
WISCONSIN: CLINTONVILLE ARPT: Rnwy 4-22 clsd (soft). Breaking action poor Rnwy 14-32. (2-20)
DRUMMOND-SORENSEN ARPT: Clsd (snow). N/S Strip under const. Const S side E/W Strip. (2-7)
GREEN BAY-NICOLET ARPT: Strips soft. Open to lgt acft only. (3-8)
**HARTFORD ARPT: 309' obst lgtd rdo twr erected 4.5 mi S (170° T) at lat 43-16-48, long. 88-23-02. (1-26)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
LAND O'LAKES-KINGS GATEWAY ARPT: Clsd (snow). (3-7)
MADISON ARPT: Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (1-21)
MARSHFIELD ARPT: E/W Rnwy plowed 100 x 2300'. Snow bank N edge. Rest of fld open to ski-equipped acft only. (1-12)
MENOMONIE ARPT: 205' rdo twr being erected 6 mi SW (219° T) at lat 44-51-25, long. 91-55-59. (2-20)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (3-5)
OCONTO ARPT: E/W and NE/SW Strips open to wheeled acft only. (1-15)
PHILLIPS ARPT: Open to ski-equipped acft only. (1-31)
SHAWANO ARPT: NE/SW Strip open to wheeled acft only. (1-15)
STEVENS POINT ARPT: Strips, taxiways plowed. Strips also suitable for skis. (1-10)
WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt. beyond 35 mi.
**GILLETTE ARPT: Correct lat. 44-21-00, long. 105-31-30. (2-28)
KEMMERER ARPT: Open to ski-equipped acft only. (1-29)
MOORCROFT-RADIO: Omnirng radials between 100° and 120° unusable beyond 30 mi at 9000' MSL. (8-8)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Grand Canyon	Roswell	WAC 469	FC 188
Grand Junction	San Francisco	WAC 470	
Klamath Falls	WAC 468	FC 181	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NEW EDITIONS

Jacksonville	1-31-51	AL 94	Columbus 2-8-51
Mobile	2-8-51	AL 218	Knoxville 2-9-51
WAC 62	1-31-51	AL 292	North Platte 2-14-51

AL 544 ADF	Omaha, Nebraska	Offutt A. F. B.	2-8-51
AL 627 ADF	Reading, Pennsylvania	Reading Airport	2-13-51

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Aeronautical Charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each; by number with prefix (ILS); Automatic Direction Finding approach charts, 5 cents each, by number with prefix (ADF); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

(OVER)

DATES OF LATEST PRINTS

U. S. Coast and Geodetic Survey

Aeronautical Charts

Dates in small type indicate minor changes which are not of sufficient importance to make the previous print obsolete. All charts carrying dates older than those shown in large type on this list are obsolete for use in flight.
